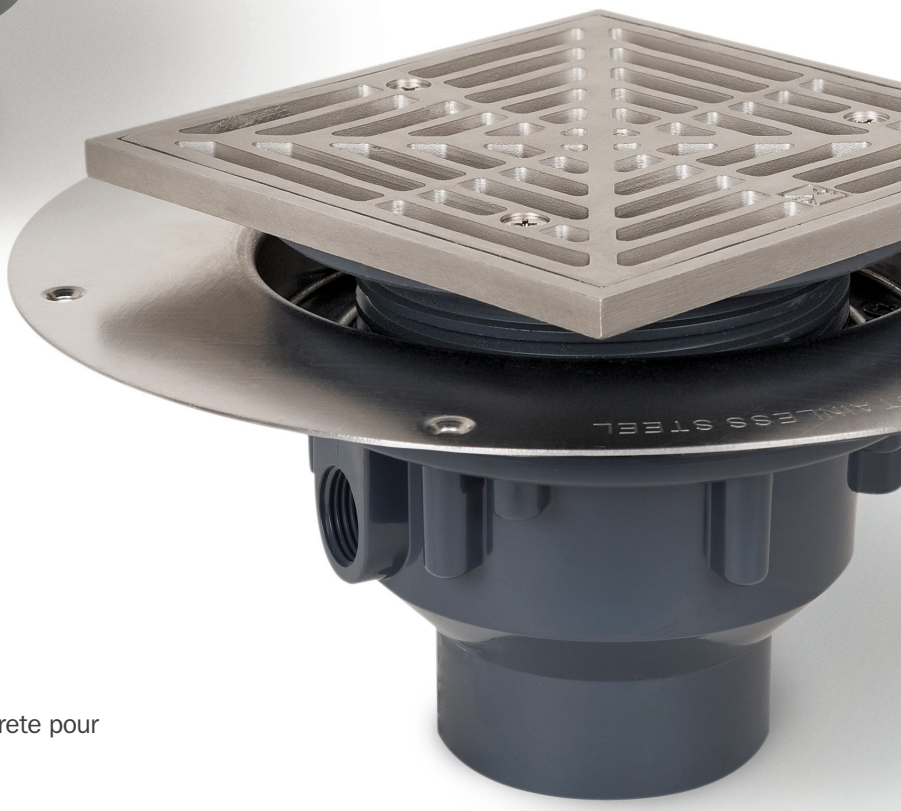
Halo™

Adjustable Drain/Cleanout with Deck Flange



Unique

Stainless steel mounting flange with adjustable head will accommodate most flooring types

FinishLine option allows adjustment after the concrete pour

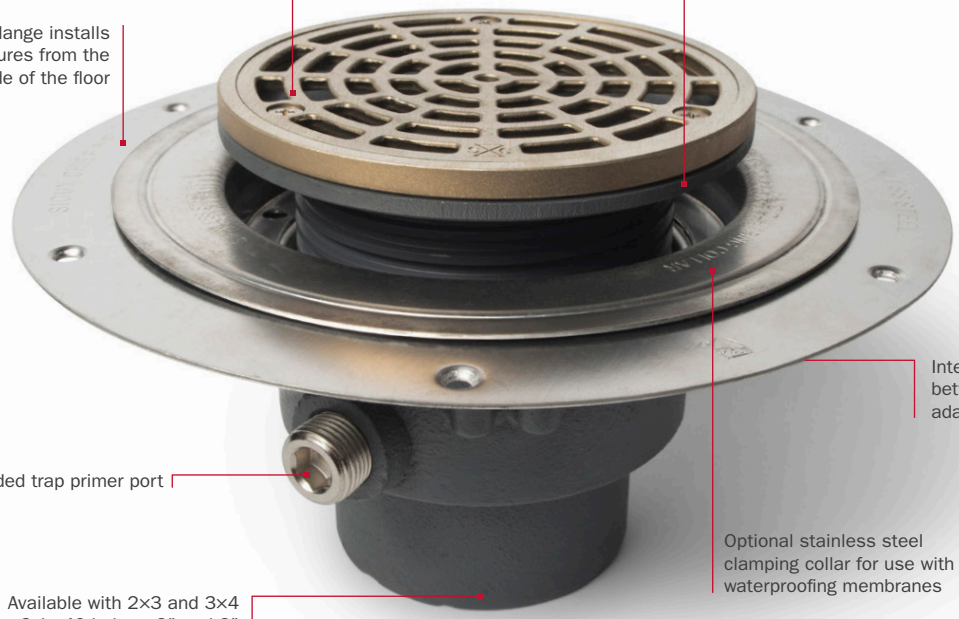
Versatile

Floor drain and cleanout models available for residential or commercial applications

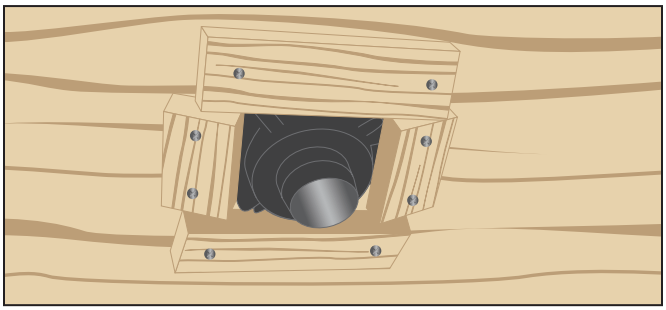
Great for laundry/mechanical rooms, loft remodels, multifamily projects, etc.

Use on wood or corrugated decks, or in cored concrete floors

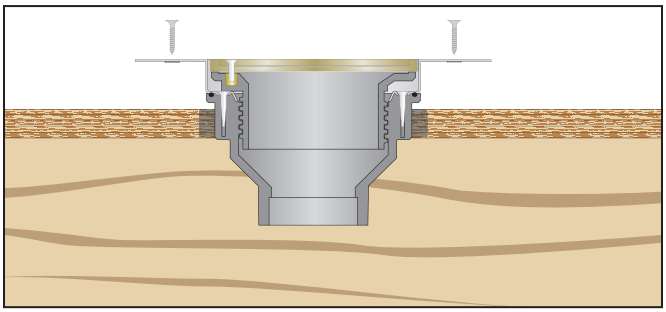
Unique Design Provides Versatility



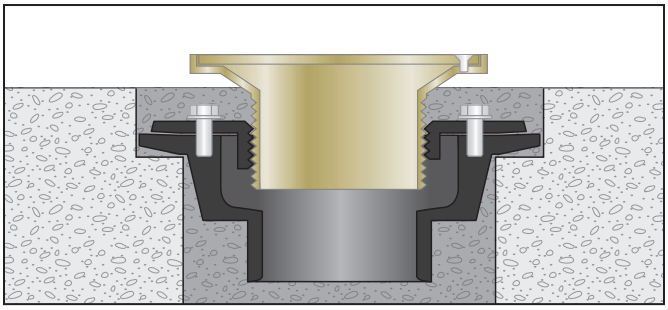
Installs Easier than Existing Methods



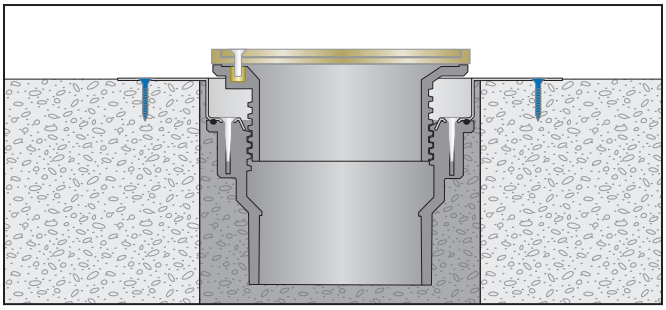
Blocking up a standard drain (with wood or strut) from under the floor is difficult and time consuming.



The Halo installs easily from the top side of the floor. Cut a 6" hole and secure with screws or nails.

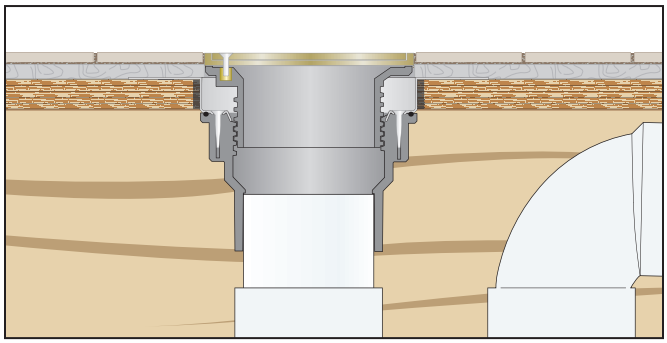


Standard drains require a more costly double-core when set in concrete slabs

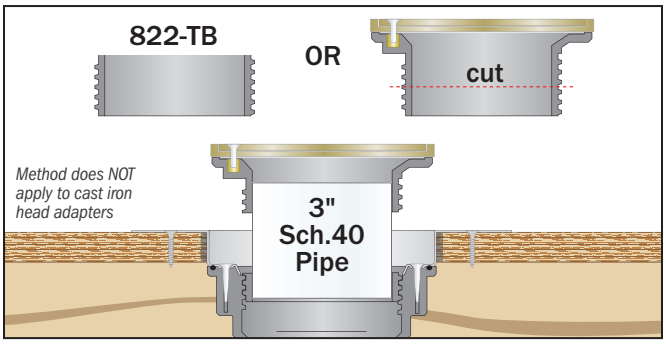


The Halo installs in a 6" cored (single) hole

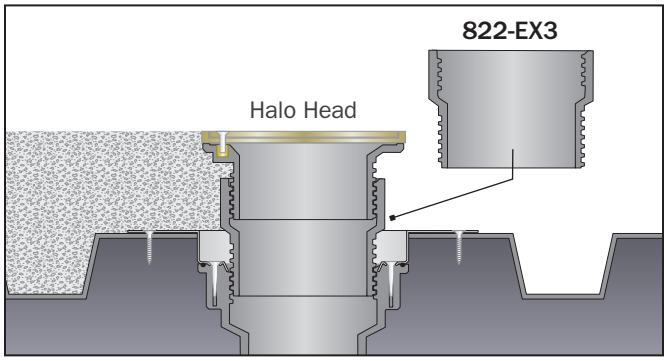
Adjusting and Extending the Head Adapter

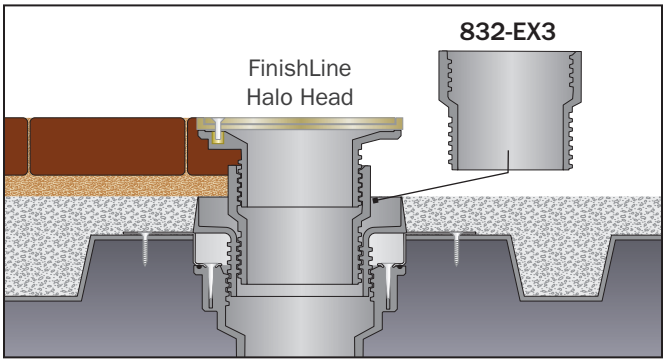


The Halo adjusts from flush, up to ¾" above the flange to accommodate thin flooring like vinyl or linoleum and thicker floors using cement board and tile.



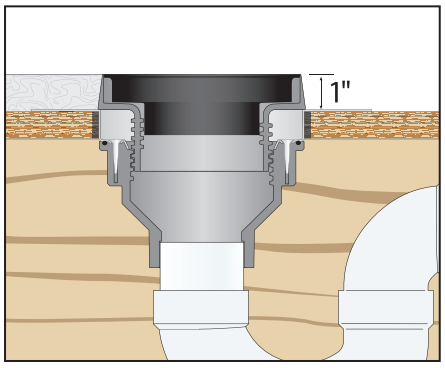
Extend Head with Pipe: Use the **822-TB** or cut the ABS head adapter across the threads. Glue a measured length of 3" Sch. 40 pipe between the two parts with solvent cement.



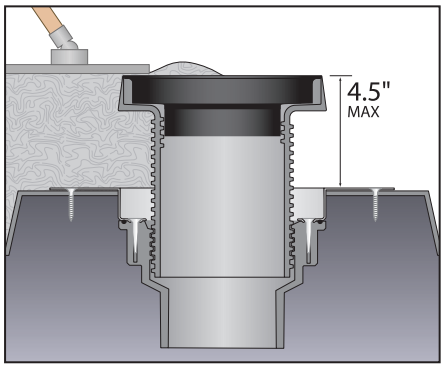


Extend Head with Adapter: The cast iron **822-EX3** extension adapter works with both ABS and cast iron components. Install between the Halo base and head adapter to extend the head from 1.75" to 3.0" above the flange.
When using FinishLine Halo fixtures, the **832-EX3** extension adapter installs between the Coring Sleeve and FinishLine Halo head. Extends the head from 2.0" to 3.5" above the Coring Sleeve rim.

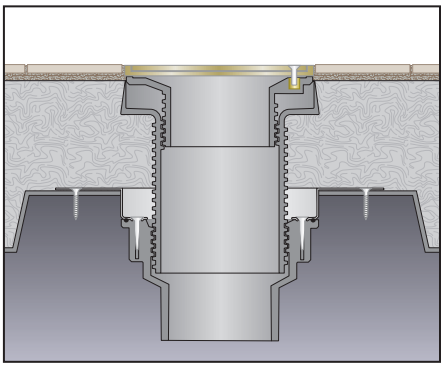
The FinishLine™ Option for Secondary Slab Pours



For lightweight concrete pours, the FinishLine option allows adjustment after the pour. Set the Halo in place and the FinishLine Coring Plug/Sleeve assembly sets 1" above the flange.



The **832-EPS3** extended Coring Sleeve (shown installed above) is great for deeper/structural slabs. It can be cut to length for easy FinishLine extensions. Finish lightweight pour or secondary slab flush with the plug/sleeve.



Remove the FinishLine Coring Plug and replace with the Finish Fixture when flooring is installed. Finish Fixture can be adjusted up to another 1" (or more when using the 832-EX3, above) after the secondary pour.

Halo™ Drain
Sch. 40 Hub Connection

- ABS or PVC connection. Outlet welds over 2" and inside 3" or over 3" and inside 4"
- Nickel-bronze or stainless steel ring and strainer - round or square pattern.

> “Eric told us about the Halo drains he had learned about on his Sioux Chief plant tour, and they ended up being perfect for the job. We were able to core drill a smaller hole, drop in and fasten, then adjust the strainer. It saved us a considerable amount of time, not to mention a lot of headaches.”

> Midwestern Mechanical

Halo™ Drain
Cast Iron No-Hub Connection

- Coated ductile iron base adapter and head. 2" or 3" no-hub connection
- Nickel-bronze or stainless steel ring and strainer - round or square pattern.

Halo™ Cleanout
Sch. 40 Hub Connection

- ABS or PVC connection. Outlet welds over 2" and inside 3" or over 3" and inside 4"
- Nickel-bronze or stainless steel ring and cleanout cover - round or square pattern.
- Includes mechanical test plug to seal out sewer gases

Halo™ Cleanout
Cast Iron No-Hub Connection

- Coated ductile iron base adapter and head. 2" or 3" no-hub connection
- Nickel-bronze or stainless steel ring and cleanout cover - round or square pattern.
- Includes mechanical test plug to seal out sewer gases

Halo™ Drains

Options: Add letter after dash in item number.
M Clamping collar kit

Options: Add suffix to end of item number.
V Vandal-resistant screws
B Complies with Buy American Act[1]
E Extended Ring[1]
9 90° side outlet connection[2]
[1] Only available for round nickel bronze ring and strainer
[2] Only available for cast iron drain
