GREEN Flag Notice

Time to Product Change: 1 Months

Note: The green flag notification indicates an **insignificant** change in form, fit, or function of an offer.

Product Name(s):	XAPD / XAPK Control stations	**Customer Support No.**	1(888)778-2733
Product Line Description:	Harmony Metal control stations	**Document Issued:**	11/09/22

Description of Change:

With the launch of the new XAPD / XAPK range of metal control stations in January of 2021, this offer will replace the current XAPM /XAPJ range which has now been discontinued. XAPD* and XAPK* retains a similar form factor to the products they have replaced, with no changes made to the external dimensions.

Current Product: XAPM & XAPJ

New Product: XAPD & XAPK

Critical Dates

Product Change Takes Effect:	11/01/2022	**Availability date of new product:**	01/01/2021

Transition Tools (as required):

See attached documents, "XAP Metal Control Station Product Update.xlsx"

"XAP refresh brochure.pdf"

https://www.youtube.com/watch?v=0oJQOQfdUIw

Description of Change: (*Continued from page 1*)

These new XAPD* and XAPK* references bring several product improvements including:

- **New improved coloring**: full RAL7035 grey color on XAPD* and full RAL1004 yellow color on XAPK*
- Compatibility: with **entire XB4/XB5 product range** and accessories including legend holders and circular e-stop legend plates
- Ergonomics: possibility to **fully customize** the lid of enclosures using legend panels through the "Select & Customize" tool on se.com
- Simplicity: rationalization of the range by keeping only one standard of cable gland tapping (ISO)

Note that the XAPG* offer with ¾ NPT tapping will remain the same but we will no longer offer the XAPG offer with PG tapping. The references XAPD*, XAPG* are designed for standard functions and XAPK* for E-stop functions. This convention aligns with the ordering codes for the plastic enclosures: XALD* for standard functions / XALK* for E-stop functions – which provides another modest benefit as well.

Additional Photos & Details

The cable gland on the metal control station products is now rationalized to offer ISO and NPT options for the threading of the hole, whereas the XAPM /XAPJ families also included Pg threading as a product variant.

Add your own aesthetic to the XAPD / XAPK products using a Legend panel – an adhesive sticker that is applied to the front face or 'lid' of the control station. The legend panel that can be fully customized by the end customer using the customization tool on se.com
