

Half Facepiece Respirators 6000 Drop Down Series

Issue Date 01/01/04

The 6000 Drop Down Series facepiece is the latest innovation in half facepiece design. The facepiece incorporates a unique drop down head harness system so that workers outside the contaminated area can more easily communicate without totally removing the respirator. It is designed for workers who wear hard hats or hard hats with liftable faceshields. With this system, the facepiece drops straight down onto the chest by detaching the neck strap.

Features & Benefits

- Workers do not need to remove the hard hat to remove the facepiece. Simply detach the neck strap and facepiece drops to the worker's chest.
- Eliminates the tendency of workers to wear the head cradle over the hard hat.
- The head cradle will adjust to the individual worker's head size.
- New, durable straps will hold their elasticity longer.
- The upper strap adjustment is on the head cradle so the strap ends do not interfere with the worker's vision.
- The exhalation valve is protected by the valve cover, increasing worker confidence in challenging conditions.
- The exhalation valve cover directs the air downward, helping to eliminate fogging of the faceshield.

3M™ Air Purifying Respirators

- The facepiece is available with spare parts.
- Use with 3M™ 2000 Series, 5000 Series, 6000 Series and 7093 filters, cartridges, and accessories.

Suggested Applications

- Painting
- Welding
- Abatement
- Wood-working
- Metal-working
- Automotive manufacturing
- Chemical manufacturing
- Pharmaceutical manufacturing
- Petrochemical
- Nuclear
- Utilities
- Primary metals

⚠ WARNING

These respirators help reduce exposure to certain airborne contaminants. **Misuse may result in sickness or death.** Before use, the wearer must read and understand *User Instructions* provided as a part of product packaging. Time use limitations may apply. Call 3M OH&ESD Technical Service at 1-800-243-4630. In Canada, call 1-800-267-4414.

Important

Before using these respirators, you must determine the following:

1. The type of contaminant(s) for which the respirator is being selected.
2. The concentration level of contaminant(s).
3. Whether the respirator can be properly fitted on the wearer's face. All respirator instructions, warnings and use and time limitations must also be read and understood by the wearer before use.

Before use of these respirators, a written respiratory protection program must be implemented, meeting all the requirements of OSHA 29 CFR 1910.134, including training, medical evaluation and fit testing.
