

Evolution™ Series – The Next Generation of Floor Boxes

Evolution™ Series Floor Boxes are the latest advancement in the most complete and innovative line of floor solutions in the industry.

In addition to a unique design that allows the same floor box to be used in multiple floor applications, high capacity and multi-functional capabilities make Evolution Series Floor Boxes ideal for areas where large capacity audio/video, power and communication services are needed. Ranging in size from 6- to 10-gangs of capacity, these boxes have completely finished interiors with removable modules that provide easy access for reconfiguring services. Evolution Series Floor Boxes are an ideal option for installations where services are constantly evolving, such as commercial offices, conference rooms, stages, and entertainment venues.

New Evolution Series Floor Boxes provide increased capacity options and a variety of innovations not available in any other floor boxes.

FEATURES & BENEFITS

■ One box many applications.

Evolution Series Floor Boxes are designed to work in concrete, raised and wood floor applications and are fully adjustable both pre- and post-concrete pour. A single box can be specified for multiple floor types without having to order additional components or accessories.

Raised Floors

Concrete Floors

Wood Floors

■ Configurable with removable modules.

In addition to having removable dividers and a tunnel feature that allows all compartments to be connected, the modules are removable through the top or back of the floor box. This allows for easier installations and facilitates moves, adds and changes without having to disconnect services, saving time and money.

■ Audio/Video Design.

Evolution Series Floor Boxes have been developed specifically with the A/V industry in mind. With 3 1/2" - 3 7/8" [89mm x 98mm] of wiring capacity behind each device plate, these boxes will accept devices from leading A/V manufacturers including Extron® Electronics and Crestron®.

■ Durable 180° articulating hinge.

Hinge design enables covers to open a full 180° and lie flat on the floor surface with the durability to support a large cover. Provides easy access to all interior modules and activations while reducing tripping hazards.

■ Auto-close egress doors.

Cable egress doors lock in position when open, and automatically closes around wires to protect cabling and reduce trip hazards.

■ Accepts standard size wall plates.

Evolution Series Floor Boxes accept industry standard single-, double- and triple-gang wall plates from industry leading manufacturers.

■ Finished interior.

Fully finished interior removes the unfinished industrial look while increasing visibility, making it easier to see where to plug in devices.

■ Large capacity.

6- to 10-gangs of capacity to accommodate power, communications, and A/V devices. A minimum of 5" [127mm] of space between devices providing ample space for hand access when plugging and unplugging into the devices.

■ Suitable for use in air handling spaces.

In accordance with Sec 300-22(c) of the National Electric Code.

■ Meets ADA Accessibility Guidelines.

Trim flange is designed to meet the ADA Accessibility Guidelines as it pertains to ADA Standard 4.5, which addresses the change in floor and ground surface levels.

■ Multiple size knockouts.

All Evolution Series Floor Boxes are available with multiple trade size knockouts ranging in size from 3/4" to 2" allowing for multiple activations and wiring configurations.

■ Die cast aluminum cover assemblies.

Evolution Series Floor Box Covers have been designed to work on multiple floor surfaces and are manufactured from die cast aluminum to provide strength and style. Decorative powder coat colors (black, brass, bronze, gray and nickel) will complement any room décor.

■ Cable Management.

Allows multiple cables to be organized and controlled for easier cable egress.

■ Furniture Feed.

Designed to be installed in concrete, raised and wood floors. Provides large capacity feeds (up to 2"). Trade size knockouts for power, communications and A/V devices.

■ Bare (polished) concrete and terrazzo applications.

Evolution Series Floor Box has been designed to be installed into bare (polished) concrete and terrazzo floors.

■ TopGuard™ Protection.

Evolution Series Floor Box covers meet and exceed UL scrub water exclusion requirements for tile, carpet, wood, bare concrete and terrazzo floor coverings.
