

OSRAM SYLVANIA		Document No.: DQ4-144-002 Revision No.: E Issue Date: 07/23/2003
Subject: Warning – Lumalux, Lumalux Standby, Lumalux Plus & Mercury-Free Lumalux HPS Lamps		
REV	Revision Description	
E	Section II, Item #2: “lamps” was “bulbs.” Also added ANSI Warning Icon. Text changes made by Manchester Engineering. See Revision D for specific changes.	

THE FOLLOWING INSTRUCTIONS MUST BE COMPLIED WITH TO AVOID RISK OF PERSONAL INJURY, PROPERTY DAMAGE AND POOR LAMP PERFORMANCE.

- I. **OPERATE WITH COMPATIBLE BALLAST AND FIXTURE ONLY:** This lamp must be operated in a fixture and ballast which has an ANSI designation identical to that found on the lamp outer glass bulb.
- II. **ELECTRICAL SHOCK AND BURN HAZARD:** Do not remove or insert lamp when power is on. If outer glass bulb is broken, shut off power immediately and remove lamp after it has cooled.
- III. **INSTALLATION AND OPERATING INSTRUCTIONS:**
 1. A specially designed socket which is electrically rated to withstand a 4000 volt pulse is required for all High Pressure Sodium lamps except for the 750 and 1000 watt lamps which require a socket rated to withstand a 5000 volt pulse.
 2. These lamps have a vacuum jacket and may implode if broken. For added safety, wear safety glasses and gloves when installing or removing lamps.
 3. To avoid burn injury, allow lamp to cool before removing from the fixture.
 4. Screw lamp firmly but not forcibly into socket to avoid breakage.
 5. Replace lamps at or before end of rated life. (See catalog for rated life.)
 6. Never install the lamp into an ordinary household socket.
 7. This lamp may be operated in any position.
- IV. **PROPER CARE AND MAINTENANCE:** To reduce the possibility of premature lamp failure:
 1. Do not use with luminaires that would cause an excessive increase in arc-tube operating voltage.
 2. Do not expose operating lamp to moisture (such as rain, sleet or snow).
 3. Replace lamp if outer glass bulb has been scratched, cracked, or damaged in any way.
 4. Electrically insulate any metal support in contact with the outer glass bulb to avoid glass decomposition.
- V. **BROKEN ARC-TUBE:** Take care in handling and disposing of this lamp. If arc-tube is broken, avoid skin contact with any of the contents and fragments. See Product Safety Data Sheet for further details.
