

Shopify Acadia App Integration

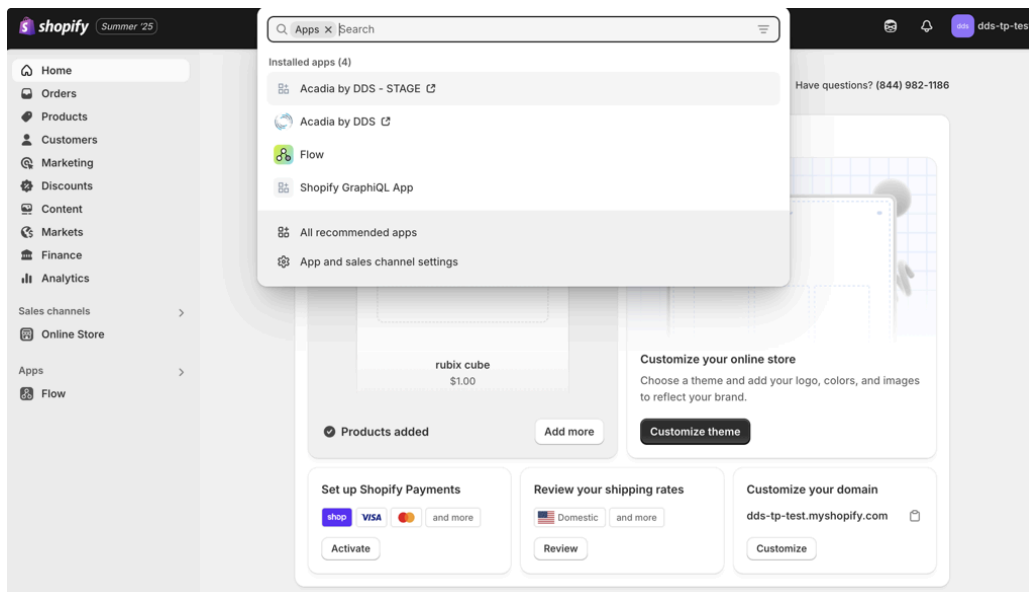

App Description

When connected, the Acadia by DDS app will sync product updates from:

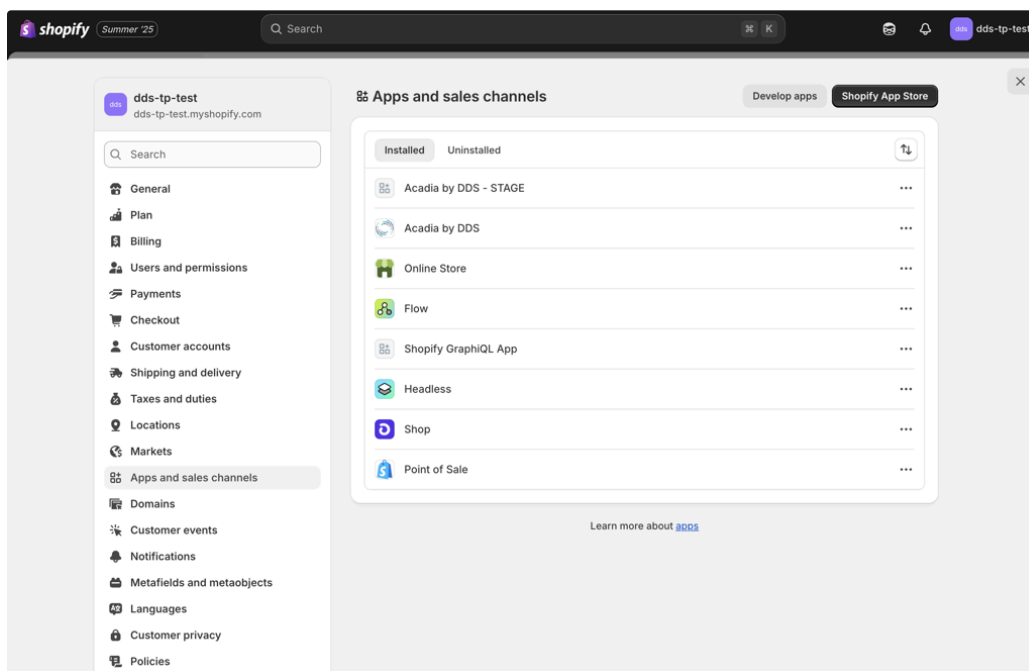

- Product edits made in Acadia, including AI Enhancements
- Product updates provided to DDS by manufacturers
- All new and existing matches, filtered by MFR if desired
- What syncs:
 - Images
 - Name
 - Specifications → Custom Fields
 - Long Description, Spec Sheet, Features, Downloads, Videos → Description using standard or custom HTML
- Introductions of new products
 - Any new products that we are not able to match to live products in your store, will be created with the **visible** flag set to **false** so pricing can be set before the product are made live.

Installation Steps

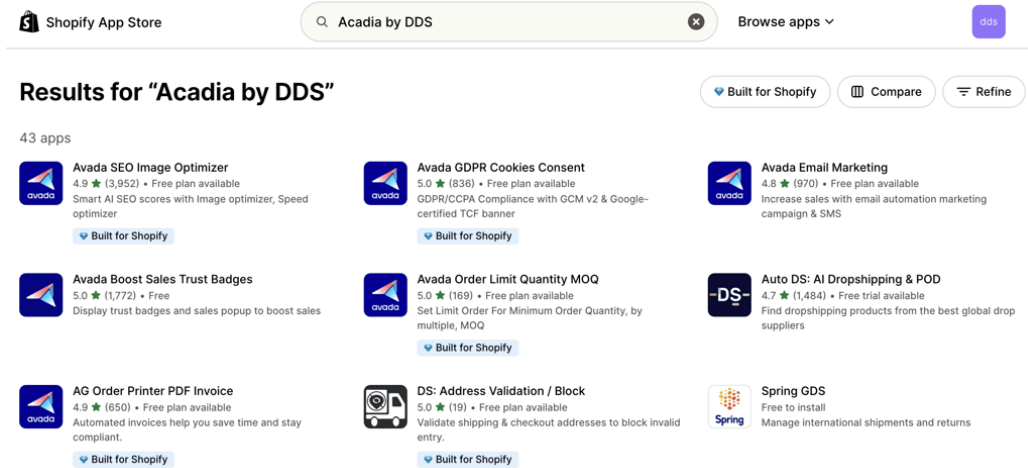

From the admin home page, select 'Apps' from the left column and then select 'App and sales channel settings' from the search dropdown

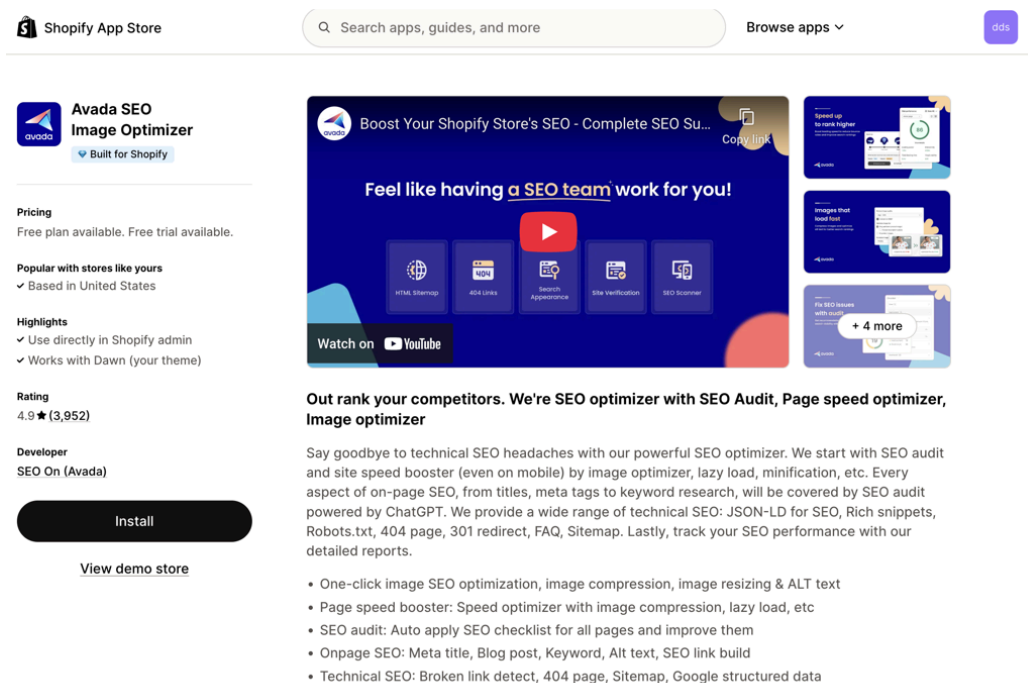

In the 'Apps and sales channels' settings page, select 'Shopify App Store' in the top right

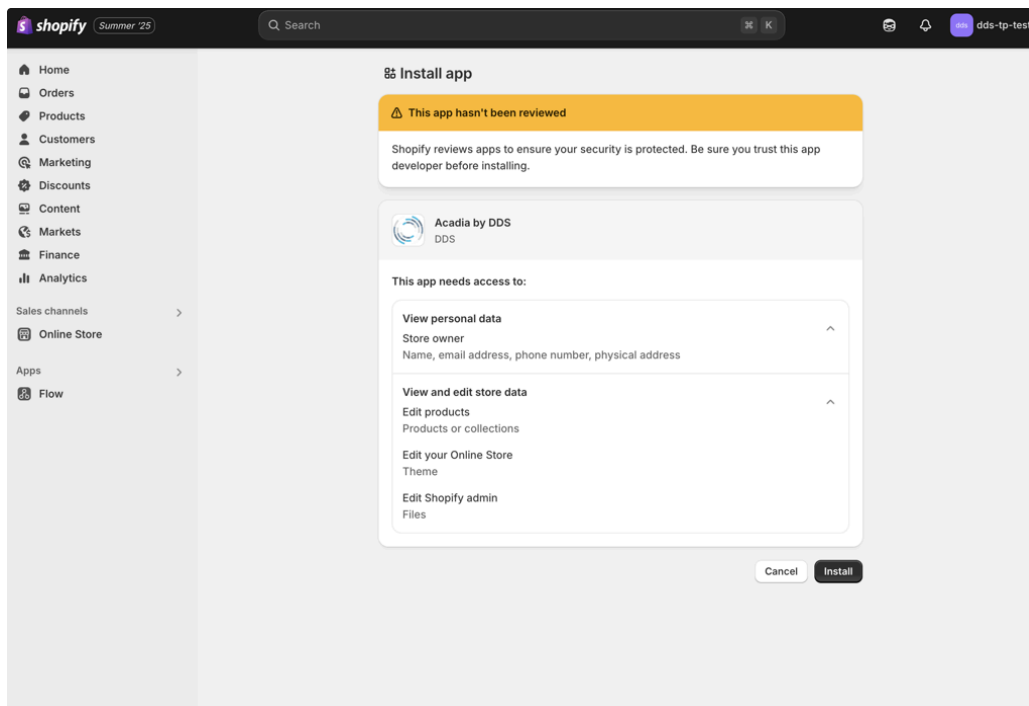

Search for 'Acadia' or 'Acadia by DDS' in the search bar and select the app from the search results (TODO add screenshot of search results when app is published)

Select 'Install' on the bottom left (TODO add screenshot of listing page when app is published)

Review the requested permissions and select 'Install' on the bottom right (TODO add screenshot of permissions page when app is published)

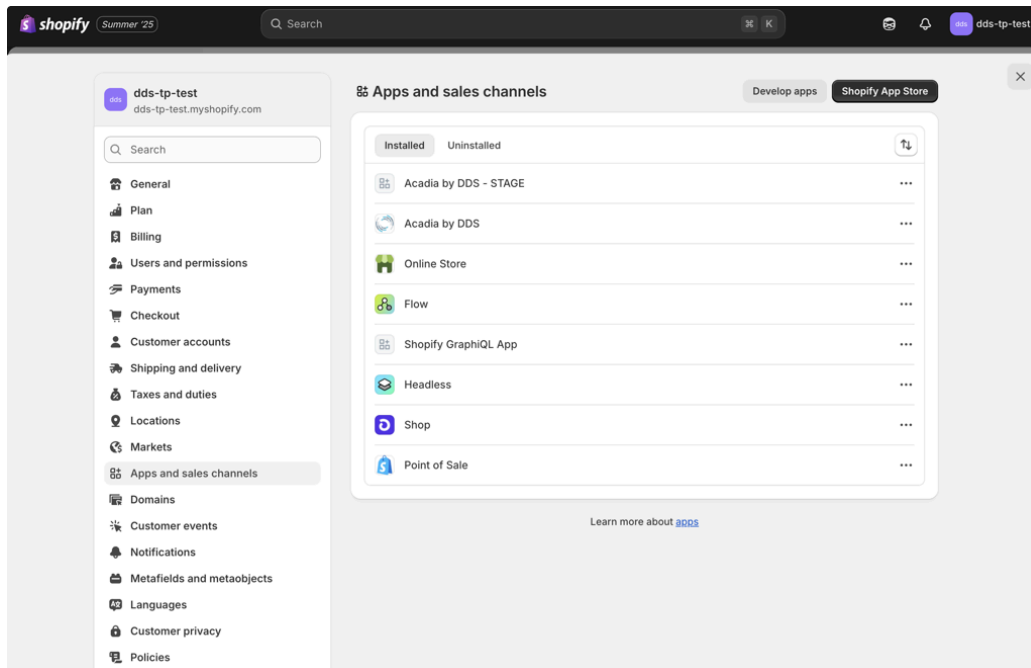

Login to your Acadia account if not already, and select 'CONFIRM' to connect your account to your Shopify storefront

Do you want to connect your Shopify Store (dds-tp-test) to Shopify Test?

CONFIRM

After completing installation, you should see the app listed under the 'Installed' tab of the 'Apps and sales channels' settings page

Using the app

App Options

Configuration for the app will eventually be managed within Acadia. In the meantime, you can work with our support team to tailor the behavior to your needs. Available options include:

- **Dry Run** – Preview changes before they go live on your store.
- **Selected Manufacturers** – Choose which manufacturers sync to your Shopify site.
- **Full Sync** – Sync all matched products to Shopify.
