

Special Purpose Plugs and Receptacles

Application

Applications:

Special purpose plugs and receptacles listed in this section are for use in non-hazardous areas, where environmental or application considerations require non-standard plugs and receptacles. Included in this section are ARK-trol® plugs and receptacles (RPC and RPE).

ARK-trol Plugs and Receptacles:

- Are used with a wide range of equipment requiring a variety of contact configurations under conditions of hard usage and exposure to rigorous environments.
- Two basic non-hazardous types:
RPC – circuit breaking power connectors;
RPE – control circuit, power and welding connectors.
- One hazardous type: RPX – "Time Slot" delayed action connectors.

RPC – A variety of configurations (with a maximum of five-poles) are available for one and three-phase circuits. Electrical range is 30, 60, 100, 200 amperes at a maximum of 600 VAC.

RPE – A wider range of configurations are available, including options with up to 39 pins.

Both types are available (either as standard or as option) with solder well terminals for high reliability, or crimp or pressure terminals for ease of installation. Listings on the following pages show complete assemblies with mating plugs and components.

RPX – Available in similar configurations as the RPC line, but can be used in areas which are hazardous.

RPC Circuit Breaking Power Connectors RPE Control Circuit and Power Connectors Non-hazardous Areas

Applications:

ARK-trol RPC circuit breaking power connectors and RPE control circuit power connectors are used:

- With a wide variety of portable electrical equipment
- For connection of devices ranging from simple lighting units, power tools, and similar portables requiring only a power supply circuit, to sophisticated control and instrumentation assemblies requiring disconnect
- Under conditions of hard usage and where exposed to dust, dirt, water, corrosion and chemical attack, providing high reliability and trouble-free service
- Indoors or outdoors in non-hazardous areas of petroleum refineries, chemical and petrochemical plants, manufacturing plants, military installations and similar locations
- On machine tools and similar equipment

Features:

- All ARK-trol connectors have the same properties, characteristics and environmental capabilities outlined under "Compliances"

Construction:

- All ARK-trol plug, receptacle and cord connector shell parts are of high-strength impact extruded aluminum, hard coated with a high density anodize finish. The resultant assemblies are lightweight, extremely strong, free from surface defects and flaws, and with superior resistance to abrasion, corrosion and chemical attack.
- "Tri-Disc" insert assemblies consist of two rigid insulators with a silicone rubber wafer between to provide a cushioning action against mechanical damage and to effect a positive seal against penetration by water, moisture, dust, gas and other undesirable matter. Assembly of the inserts compresses the silicone wafer to seal against the inner wall of the plug or receptacle shell, and around each individual contact.
- ARK-trol insulating material is of high dielectric and mechanical strength with low moisture absorption and excellent resistance to arc tracking. Socket contacts are each enclosed in a separate chamber in the silo insulator. Arcs formed while making or breaking a circuit are quickly snuffed out in the chambers.
- Contacts are removable and, for ease of installation, are snapped into the insert assemblies after wire termination. Termination methods employed are solder, crimp and pressure. Solder well contacts are standard and are furnished unless otherwise specified. Crimp

contacts are available in all sizes and configurations. Pressure contacts, due to increased terminal area, are available only in certain assemblies as shown in the listings.

- For cable strain relief and watertight seal, plugs and cord connector receptacles are provided with gland nut and tapered neoprene bushing.
- Contacts are removable and, for ease of installation, are snapped into the insert assemblies after wire termination. Termination methods employed are solder, crimp and pressure. Solder well contacts are standard and are furnished unless otherwise specified. Crimp contacts are available in all sizes and configurations. Pressure contacts, due to increased terminal area, are available only in certain assemblies as shown in the listings.
- For cable strain relief and watertight seal, plugs and cord connector receptacles are provided with gland nut and tapered neoprene bushing.

Positive Polarization:

- Polarization of ARK-trol connectors is such that plugs and receptacles cannot be mated incorrectly.
- Insert assemblies must be correctly aligned and will fit plug and receptacle shells in one position only, because of a raised key on the inner wall of the shells.
- Seven keys on the inner wall of the receptacle and seven mating keyways on the outer diameter of the plug shell are spaced so that the plug and receptacle can be mated in one position only. One key and one keyway are larger than the other six as a guide to rapid connection, easily performed under adverse field conditions – even in total darkness.

Interchangeability:

- Shell components and insert assemblies in each diameter are interchangeable. Both male and female basic shells will accept either pin or socket inserts. This feature permits the use of both plug and receptacle in either an energized or de-energized condition.

Grounding:

- Grounded connectors have pin and socket contacts with integral grounding straps which press against the inner wall of plug, receptacle and cord connector shells, effectively bonding the shells to the grounding contacts.
- Grounding socket contacts are longer than current carrying contacts to make first and break last, assuring a positive ground before circuits are energized and after circuits are de-energized.

Standard Materials:

- Back boxes and adapters – copper-free aluminum
- Plug, receptacle and cord connector shells – impact extruded aluminum
- Insulation – diallyl phthalate (DAP)
- Insulation – fiberglass-reinforced polyester material
- Sealing wafer – silicone rubber
- Contacts – hard drawn copper

Standard Finishes:

- Copper-free aluminum – natural
- Impact extruded aluminum – hard coat anodized
- Diallyl phthalate – natural (blue)
- Fiberglass-reinforced polyester material – natural (red)
- Silicone – natural (grey)
- Copper – silver plated

Options:

- Alternate polarities – ungrounded connectors. Standard polarity is position "N" shown below. Alternate positions "V", "W", "X" or "Y" can be furnished. To order, substitute for the letter "N" in the listed Cat. No., the letter for the desired polarization.

Example: RPC217-127-SO1N-ARE23 with polarity "X" becomes RCP217-127-SO1X-ARE23.

- Alternate polarities – grounded connectors. Standard polarity is position "A" shown below. Alternate positions "B", "C", "D" or "E" can be furnished. To order, substitute for the letter "A" in the listed Cat. No., the letter for the desired polarization.

Example: RPC217-127-SO2A-ARE23 with polarity "D" becomes RPC217-127-SO2D-ARE23.

RPC Circuit Breaking Power Connectors RPE Control Circuit and Power Connectors Non-hazardous Areas

Options (continued):

- Crimp type contacts – available on all assemblies with solder well contacts. To order, add letter "T" to Cat. No., immediately following polarity letter.

Examples: RPC217-127-S01N-ARE23 and RPC217-127-S02A-ARE23 except with crimp contacts would be ordered as RPC217-127-S01NT-ARE23 and RPC217-127-S02AT-ARE23 respectively.

- Alternate cable strain relief methods for plugs and connectors:

Stainless steel wire mesh cord grip. To order, add letter "K" to first section of Cat. No.

Example: RPC117-150-P01N with wire mesh grip would be ordered as RPCK117-150-P01N.

Adapter for use with liquid tight/rigid conduit. To order, add letters "LT" to first section of catalog number.

Example: RPC117-150-P01N with liquid tight/conduit adapter would be ordered as RPCLT117-150-P01N.

Electrical Rating Ranges:

- Voltage – 250, 480 and 600VAC
- Frequency – 50* to 400 hertz
- See listings for specific ratings

Ampere Ratings:

- Ratings given in the table at right are applicable to RPC circuit breaking power connectors and RPE control connectors, as indicated.
- RPC connectors are capable of making or breaking circuits at the full rated load indicated in the table on the listing pages.
- Contact assemblies of RPE connectors have the current carrying capabilities shown in the table, as defined by applicable military specifications (MS) and NEC requirements, for circuits not made or broken under load. It should be noted that these non-interrupting ampere ratings exceed the NEC rating of the corresponding wire size.

Contact Size AWG	RPC Circuit Breaking Connectors NEC Rating	RPE Connectors Non-Interrupting Ampere Rating	
		MS(AN)	NEC
#16		22	16
#12	20A	41	30
#10	30A	57	40
#4	60A	135	90
1 / 0	100A	250	160
4 / 0	200A	335	225

Certifications and Compliances:

Properties	Characteristics
Industrial use	excludes dust, lint, fibers and flying, oil seepage and coolant seepage – meets J.I.C. Standard
Driptight	excludes falling moisture or dirt – materials unaffected by condensation
Weather resistant (weatherproof)	performs normally in outdoor areas
Watertight	excludes water by hose spray or stream
Dust-tight	excludes dust, but performs normally if dust is accidentally enclosed during disconnect
Chemical resistance	high resistant to alkalis, strong caustics, acids, petroleum base and organic solvents
Pressure	300 psi external – 200 psi internal

Compliance with Military Specifications

Environment	Performance Data
Corrosion resistance	salt spray 300 days. MIL-STD-810E
Temperature	–80°F to 275°F, meeting requirements of MIL-STD-810E
Air leakage	exceeds Class E specification MIL-STD-810E
Dust resistance	exceeds requirements of MIL-STD-810E
Shock resistance	50G exceeds MIL-STD-810E
Vibration	exceeds 20G, method II, MIL-STD-810E
Humidity & moisture	exceeds Class E specification MIL-STD-810E
ANSI/UL Standard	498

*For use on system less than 60 hertz the receptacles, plugs and connectors are for disconnect use only.

Catalog Numbering System

**Connector Series:**

RPC – circuit breaking
 RPE – for disconnect use only
 RPX – hazardous (gasoline or equivalent hazards)

Additional Cable Strain Relief (Optional):

K = Wire mesh cord grip
 LT = Liquidtight/conduit connection

Shell Parts Designation:

0 = No shell part required
 1 = Plug shell
 2 = Receptacle
 3 = Cord connector
 4 = Connector handle body only
 5 = Plug shell (long)
 6 = Receptacle (long)
 7 = Cord connector (long)

Shell Size:

Inside Diameter measured in X/16" (017, 021, 033, 041, i.e., 017 shell size = $\frac{17}{16}$ ")

Component Accessories:

This code indicates the combination of shell parts to fit your application; e.g., 014 = square flanged receptacle with insert retaining nut and dust cap; 150 = plug handle body, bushing, and clamping nut for cable with a diameter of .250 to .625.

Contact Type:

P = Pin (male)
 S = Socket (female)

Contact Configuration:

This assigned code indicates the actual configuration of the contacts (pin and socket) in the insert assembly for a particular shell size. This is based upon electrical ratings (amperage and voltage) and the number of contacts required. It does not indicate the number of contacts in the configuration.

Polarity Designation:

N = Standard position – ungrounded
 V, W, X or Y = Alternate positions – (ungrounded)
 A = Standard position – grounded
 B, C, D or E = Alternate positions – (grounded)

Contact Termination:

Blank = Solder well (standard unless noted)
 R = Pressure (See complete ordering information that follows for availability)
 T = Crimp (available in all configurations)

Plugged Contact Openings (Optional):

This option allows greater flexibility, allowing for unique wiring requirements. The number following the slash indicates the total number of contacts that will be supplied (including ground contact, if applicable); all other openings in the insert assembly will be plugged.

Back Boxes (Optional):

See page 1445 for back box information.

■ For square flanged receptacle *without* dust cap, change the middle three digits of the catalog number from 014 to 127. Example: RPC221-127-S04AR-ARE23.
‡For square flanged receptacle with dust cap for panel mounting, delete the last digits of the catalog number specifying the backbox. Example: RPC221-014-S04AR.
*For plugs and cord connectors:
Liquidtight/Conduit Adapter –
To order with adapter, add letters "LT" to first section of catalog number. Example: RPCLT321-160-S04AR.
Additional Cable Strain Relief Options –
• Stainless steel wire mesh grip – To order, add letter "K" to first section of catalog number. Example: RPCK321-160-S04AR.

†Solder well terminals provided as standard. Crimp contacts are optionally available, add suffix T to catalog number. Example: RPE633-014-S24NT-AJ57.

‡For square flanged receptacle *without* dust cap, change the middle three digits of the catalog number from 014 to 127. Example: RPE633-127-S24N-AJ57.

*For square flanged receptacle with dust cap for panel mounting, delete the last three digits of the catalog number specifying the backbox. Example: RPE633-014-S24N.

§For plugs and cord connectors:
Liquidtight/Conduit Adapter –
To order with adapter, add letters "LT" to the first section of the catalog number. Example: RPELT733-396-S24N.

Additional Cable Strain Relief Options –

- Stainless steel wire mesh grip – To order, add letter "K" to first section of the catalog number. Example: RPEK733-396-S24N.

8P RPC and RPE Connectors

Accessories

For #16 Through #10 Contacts:

The RPE017-440 crimping tool has been designed to crimp a wide range of solid and stranded type conductors. The crimping head is adjusted and sealed at the factory. The tool automatically crimps and gauges all size contacts without readjustment.

Contact Removal Tools:

The contact removal tool extracts the contact from the insert assembly without complete disassembly of the connector.

Cat #	Description
RPE017 402T	for use with #16 contacts.
RPE017 403T	for use with #12 contacts.
RPE017 404T	for use with #10 contacts.
