

Champ VMVL

LED lighting for hazardous areas

Safe. Reliable. Efficient.
5 models from 3,000 to 11,000 lumens

Powering Business Worldwide

Champ VMVL LED

Safe. Reliable. Efficient.

Featuring a broad range of LED luminaires for harsh, hazardous and industrial environments, Eaton's Crouse-Hinds delivers lighting solutions that perform reliably in even the worst operating conditions. This reduces energy, maintenance and manpower costs.

Why LED?

Useful life

Rated life is up to 60,000 hours of maintenance-free and safe operation

Energy efficiency

LED average energy consumption is significantly less than traditional fluorescent and HID fixtures

Start/restart time

Instant illumination versus 10 minute restrike time for HID

Light quality

Higher color rendering compared to fluorescent and HID

Environmental benefits

Mercury-free LED eliminates disposal costs and lower energy consumption for a smaller carbon footprint

Why Crouse-Hinds?

Rugged design

Built to withstand extreme temperatures, vibration, water and dust

High efficacy

Up to 127 lumens per watt (model dependent)

Thermal management

Effective heat sinking ensures longer life

Quality of light

Custom optics designed to maximize light distribution and intensity

Versatile mounting

LED fixtures are compatible with Crouse-Hinds' HID installed base

Design features

Shown with optional diffused lens

Built to last:

- Type 4X rated
- Impact-resistant lens sealed from the outside environment provides ingress protection against water and dust
- Die cast aluminum LED housing provides efficient thermal path to heat sink assembly
- Vertical fin design facilitates air flow and dust shedding

Simple installation and replacement:

- Contractor-friendly design is ideal for both retrofit and new construction
- Easy to retrofit using existing HID Champ mounting module
- Available with lever lock connectors and standard three-pole terminal block

Multiple lens options:

- Clear glass lens standard
- Optional lenses include diffused glass or clear polycarbonate

Custom optics:

- Type I, III and V optics designed to maximize light distribution and intensity*

* Type V optics standard.

Increased efficiency and durability:

- Up to 127 lumens per watt (*7L model*)

Connected lighting

Flexible & intuitive software controls

Tune light output to meet safety and task needs – light where you need it

Crouse-Hinds.com/LEDconnected

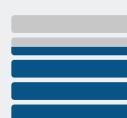

Why choose Champ VMVL?

Safe, reliable and efficient. VMVL LED luminaires are engineered to deliver high lumen output and maintenance-free long life in the toughest conditions.

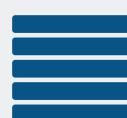

VMVL-7 vs. 175 watt HID

77%
ENERGY
EFFICIENCY

75%
TOTAL COST
OF OWNERSHIP

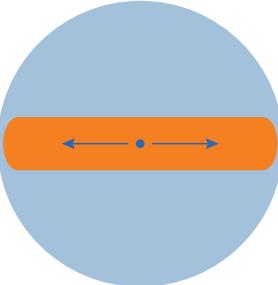

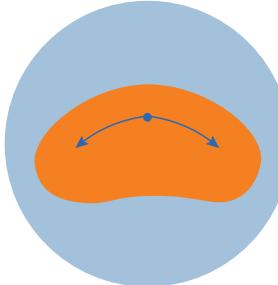

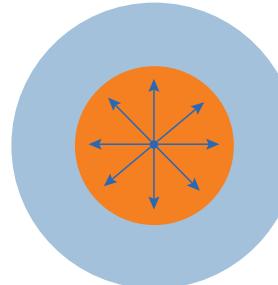

100%
MAINTENANCE
REDUCTION

Assumptions: Calculations based on overall life of the LED system. Energy cost of \$.09 per kilowatt; 24 hour per day operation; labor rate of \$75 each for 2 workers; average time for fixture maintenance of 1 hour.

Custom optics

Three optical options to maximize light distribution and intensity

 VMVL-3 to VMVL-11	 TYPE I Long and rectangular for hallways, walkways, loading docks, catwalks. Ideal for: <ul style="list-style-type: none">• Mining conveyor belts• Aisleways and hallways• Catwalks and walkways• Ramps and loading docks• Tunnels with overhead mounts	 TYPE III Stanchion and wall mount light distribution, minimizing spillover on the wall. Ideal for: <ul style="list-style-type: none">• Narrow crosswalks or passages with wall mounted fixtures• Tunnels with wall mount• Wall or stanchion mount requiring 180° forward throw beam patterns	 TYPE V Regular circular distribution pattern for high/low bay indoor and outdoor ceiling or pendant mount lighting. Ideal for: <ul style="list-style-type: none">• Pendant, ceiling or stanchion mount overhead building mounts• Processing mills, industrial plants, large buildings, warehouses, etc.
			

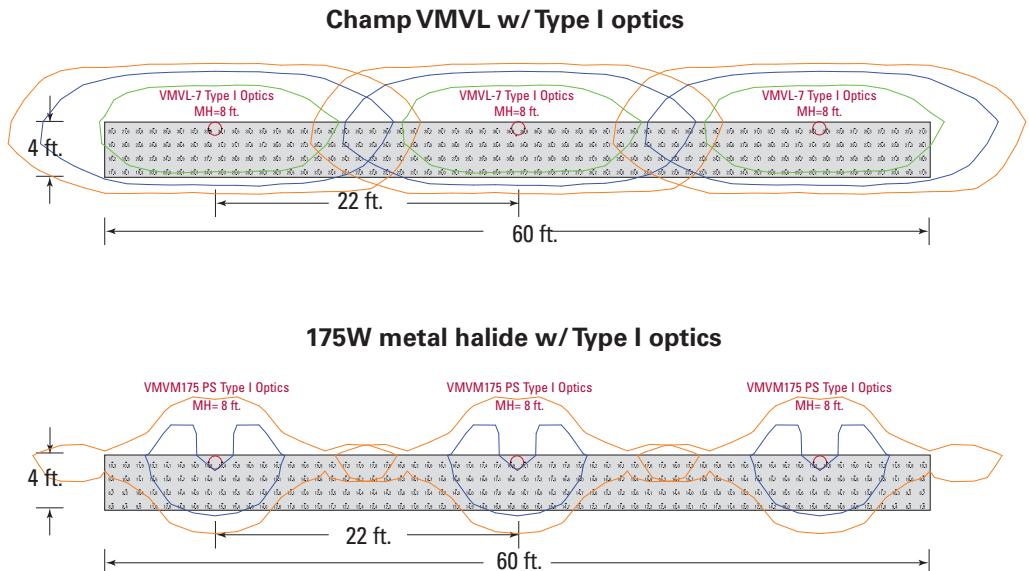

Case study: Type I optics

Catwalk/conveyor lighting

Utilizing Eaton's Crouse-Hinds lighting layout services, Champ VMVL luminaires with Type I optics and HID luminaires are shown installed on a catwalk to compare photometrics.

Comparison

Champ Type I LEDs have a wider linear pattern than equivalent HID luminaires and provide more efficient light dispersion, which fully illuminates the catwalk.

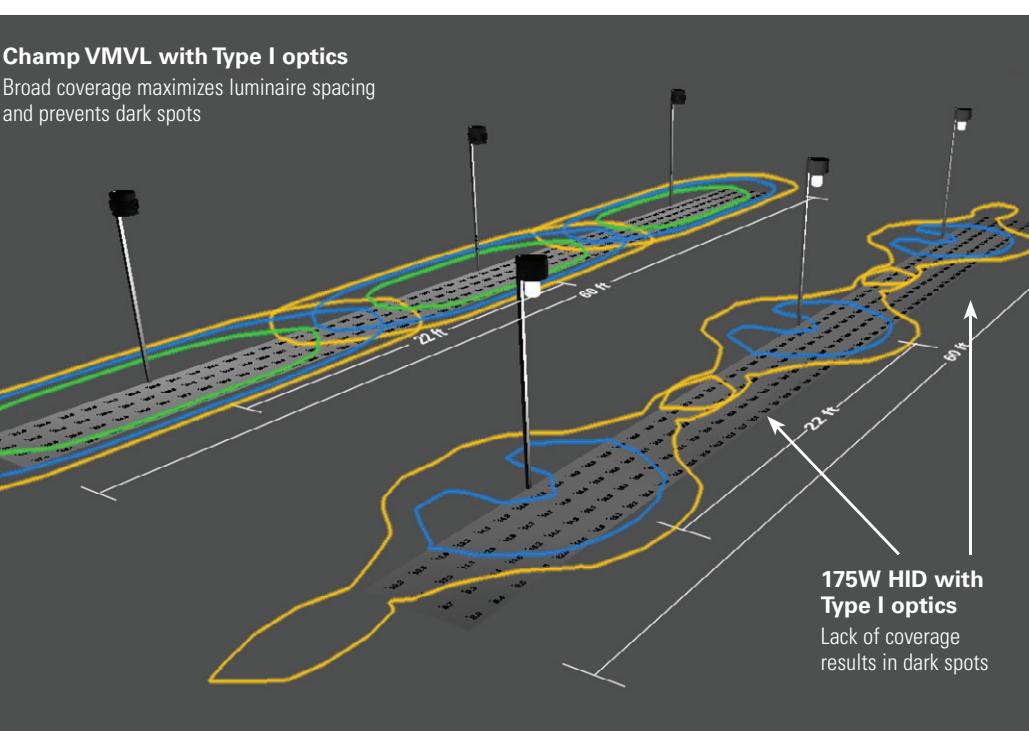

Results

Champ VMVL LED with Type I optics provides superior illumination along the conveyor and walkway safely. With no gaps in illumination, the optical pattern allows for increased spacing of fixtures and a safer conveyor system.

Savings realized

- Champ Type I pattern allows for greater fixture spacing along the catwalk or conveyor system
- Increased visibility with no dark spots results in safer conditions for workers
- Up to 77% energy savings over the life of the fixture

Champ VMVL has broader coverage area, higher delivered footcandles and uniformity for a typical catwalk or conveyor application.

Rugged solutions for complex environments.

Champ VMVL LED luminaires are engineered to provide maintenance-free illumination in the most demanding hazardous rated environments.

The Champ VMVL features a compact, high efficacy design with custom optics to ensure maximum efficiency and mounting flexibility, including the ability to retrofit the Crouse-Hinds installed base to service both LED upgrades and new projects.

Model	Nominal lumens*	Watts	Efficacy	Equivalent HID
VMVL-3	3,250	26	123 lm/W	70W
VMVL-5	5,537	43	127 lm/W	100W
VMVL-7	7,442	59	127 lm/W	175W
VMVL-9	9,234	73	126 lm/W	250W
VMVL-11	11,114	91	122 lm/W	320W

*Nominal lumens based on Type V optics, 5000K CCT with clear glass lens.
Wattage measured at 120 VAC.

Applications:

- For areas with mounting heights of up to 30 feet
- Oil and gas refineries, drilling rigs, petrochemical facilities, food and beverage facilities, platforms, loading docks, tunnels, indoor/outdoor spot lighting, outdoor wall and stanchion mounted general area lighting, and where flammable vapors, gases, ignitable dusts, fibers or flyings are present
- Locations requiring continuous and consistent light levels in extreme ambient temperatures
- Where extremely corrosive, wet, dusty, hot and/or cold conditions exist
- Classified and hazardous locations

Champ VMVL benefits:

- Instant illumination and restrike
- Cold temperature operation / no warm-up required
- Option for redundancy in drivers with multiple series circuits connected to each driver to avoid complete loss of illumination
- Easy installation - compact modular fixture attaches onto existing Champ mounting module
- Energy-efficient technology - up to 77% energy savings over HID fixtures
- Contains no mercury or other hazardous substances
- Shock- and vibration-resistant solid-state luminaires have no filaments or glass components that could break - greatly reduces the risk of premature failure
- Operating ambient: -40°C to 65°C
- Up to 60,000 hours lifetime at 55°C
- 5 year fixture warranty†

†Refer to page 2 of the authorized distributor price book for Crouse-Hinds standard Terms and Conditions.

LED system:

- High intensity discrete power emitters
- Standard: cool white (5000K, 70 CRI); optional: warm white, (3000K, 80 CRI) or neutral white (4000K, 70 CRI)
- Custom Type I, III and V optics available

Colored LED options:

- Available in green or amber*
- Reduction in light pollution for night space observation and sky glow due to isolating blue wavelength in red and amber colors
- Wildlife-friendly
- Improves visibility for telescopes in observatories during night sky space exploration

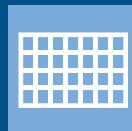

*Custom optics not available with colored LEDs.

Connected lighting

Remote monitoring and control for use in **hazardous and hard-to-access areas**.

Connected lighting highlights:

Advanced scheduling control allows for improving energy efficiency during non-operational hours. Easy software control lets a user set up schedules for lights to be on and off at pre-defined times, removing the challenges of manual management.

Daylight harvesting allows for use of the daylight and adjusts the light level of luminaire to maintain the desired light levels. It is best suited for outdoor environments or indoor areas where daylight is present during operational hours of a facility.

Fixture grouping is an added benefit that maximizes control in a defined area. By grouping light fixtures, same control settings can be applied to them to increase efficiency and response time.

Occupancy sensing is best used in areas that see infrequent traffic, such as storage areas of warehouses. Innovative occupancy sensor controls can automatically illuminate the area once presence is sensed in an area and also turn it back off when sensors stop sensing the presence.

Advanced dimming controls help reduce the energy consumptions by setting dimming levels. Dimming controls could be used in conjunction with other control features, such as scheduling and occupancy sensing, to improve energy savings.

Flexible & intuitive software controls

Tune light output to
meet safety and task needs
– light where you need it
