

PTB and PTC pull boxes (pencil boxes)

UL Listed

4E

For use in threaded rigid or IMC
conduit applications

Applications:

Pull box enclosures are installed in conduit systems (typically bridges/refineries) to:

- Act as pull and splice boxes
- Protect conductors in threaded rigid conduit
- Interconnect lengths of conduit
- Change conduit direction
- Provide access to conductors for maintenance and future system changes

Features:

- More internal cubic capacity for different sized conductors
- Accurately tapped, tapered threads (NPT) for tight, rigid joints and ground continuity
- PTB – 90° pull boxes; PTC – straight pull boxes

Certifications and compliances:

- UL Listed to UL standard 514A (see catalog number listings below)

Standard materials:

- Bodies – painted steel (RAL 7032 standard; powder coated any RAL color chip available upon request); 316L stainless steel (see standard grade catalog numbers below)
- Hubs – steel; stainless steel
- Cover bolts – 316L stainless steel

Standard finishes:

- Polyester powder coated over zinc primer
- Electro-chemical polished stainless steel

Finish options:

- Brushed stainless steel
- Polyester powder over painted stainless steel
- Natural finish stainless steel
- Polyester powder over painted carbon steel
- Galvanized carbon steel
- Zinc electroplating

Options:

Description

- Custom lengths and sizes..... **Contact factory**
- Powder coating to any RAL color chip **Contact factory**
- Supplied cable gland options **Contact factory**

Suffix

Size ranges:

- 12" through 48", hub sizes 1" to 6"
