

4DimensionTM strut & accessories

Energizing a world that demands more.

We deliver:

- **Electrical solutions** that use less energy, improve power reliability and make the places we live and work safer and more comfortable
- **Hydraulic and electrical solutions** that enable machines to deliver more productivity without wasting power
- **Aerospace solutions** that make aircraft lighter, safer and less costly to operate, and help airports operate more efficiently
- **Vehicle drivetrain and powertrain solutions** that deliver more power to cars, trucks and buses, while reducing fuel consumption and emissions

Discover today's Eaton.

Powering business worldwide

As a global power management company, we help customers worldwide manage the power needed for buildings, aircraft, trucks, cars, machinery and businesses.

Eaton's innovative technologies help customers manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably.

We provide integrated solutions that help make energy, in all its forms, more practical and accessible.

With 2014 sales of \$22.6 billion, Eaton has approximately 100,000 employees around the world and sells products in more than 175 countries.

Powering Business Worldwide

Eaton is a leading manufacturer and fabricator of steel and aluminum B-Line series products which are used in support of equipment for industrial, commercial, utility, and OEM installations. We are proud of the exacting standards of research, design, engineering, and manufacturing that go into each and every product that comprise our strut product line. Our customers have access to the most complete support systems offered in the industry, including metal framing, cable tray, pipe hangers, slotted angle, and fasteners.

Many of our products are listed by the Underwriter's Laboratories, Inc. All of our products are manufactured to meet or exceed Metal Framing Manufacturers Association (MFMA) and other industry standards set for their design and manufacture.

Metal Framing Manufacturers Association

Eaton has also developed a comprehensive B-Line series 4Dimension™ resource webpage that complements the product information provided in this catalog. This content is available to view online and for download. These resources are useful for training, calculating savings, engineering support, cross-reference and ordering.

These electronic resources include:

- One-page Flyer
- Tri-fold Value Prop Brochure
- Common Applications
- Cross-reference / Stock Recommendation
- List prices for all 4Dimension™ materials
- Savings Calculator
- Engineering information & submittals
- Instruction Sheets
- Training Presentation
- Overview Video
- Value Prop Video
- Instructional Videos
- FAQ

CoSPEC, the Specifier Center, is designed to help you easily SELECT, VIEW and DOWNLOAD Eaton's B-Line Series product design content in any one of nearly one hundred non-proprietary and proprietary CAD, BIM, PDMS, and graphics formats, which helps speed the integration of the content into your design project.

Features

- Easy integration and configuration
- Comprehensive library of 2D drawings and 3D models for CAD, BIM, PDMS, SP3D, and graphics output
- The most up to date software versions and product data information are always available
- Submittals and specification sheets in PDF format
- Proprietary file format outputs are native to the chosen software

Nearly a Hundred Download Options

- Aveva PDMS and Intergraph SmartPlant SP3D (on select products) content
- Autodesk Revit output available
- Proprietary formats from AutoCAD to SolidWorks to Catia
- Non-proprietary formats like DXF and STEP, and more
- Graphics files in a number of formats including EPS

Channel

4Dimension channel is cold formed on our modern rolling mills from 18 Ga. (1.2mm) low carbon steel. A continuous slot with inturred lips and up to three dovetail designed sides provide the ability to make attachments on multiple sides of channel.

Lengths & Tolerances

All channels excluding SH style: $\pm \frac{1}{8}"$ (3.2mm) on 10' (3.05m) and $\pm \frac{3}{16}"$ (4.76mm) on 20' (6.09m)

All 'SH' channels only: $\pm \frac{1}{4}"$ (6.35mm) on 10' (3.05m) and $\pm \frac{1}{2}"$ (12.70mm) on 20' (6.09m)

Custom lengths are available upon request.

Slots

Slotted series of channels offer full flexibility. A variety of pre-punched slot patterns eliminate the need for precise field measuring for hole locations. Slots offer wide adjustments in the alignment and bolt sizing.

Dove-Tail Sides

A variety of pre-punched $\frac{9}{16}"$ (14.3 mm) diameter hole patterns are available in our channels. These hole patterns provide an economical alternative to costly field drilling required for many applications.

Materials & Finishes (Unless otherwise noted)

Steel: Plain & Pre-galvanized

18 Ga. (1.2mm)

Note: A minimum order may apply on special material and finishes.

Design Load (Steel & Stainless Steel)

The design loads given for strut beam loads are based on a simple beam condition. This allowable stress results in a safety factor of 1.68.

Metric

Metric dimensions are shown in parentheses. Unless noted, all metric dimensions are in millimeters.

Compatibility of strut products with 4Dimension Strut System

Throughout the catalog, strut products that are compatible with the 4Dimension strut system will be flagged with the following symbol.

Recommended Torque (as shown in tables)

Note: Refer to bottom of page 7 for special torquing note of 4D21SH and 4D22SH or 4D21S and 4D22S trapeze assemblies.

Recommended Torque (4D21SH & 4D22SH or 4D21S & 4D22S trapeze assemblies)

Recommended torque on 4Dimension trapeze hangers using 4D21SH and 4D22SH or 4D21S and 4D22S channel and traditional hardware (B200 series square washer, hex nuts, and lock washers) is 10 ft./lbs. (13Nm) for $\frac{5}{16}"$, $\frac{3}{8}"$, and $\frac{1}{2}"$ ATR.

Dimensions are in inches unless otherwise noted. Metric dimensions are in parentheses and are in millimeters unless otherwise noted.

4D5000 - Flip Clip™ Trapeze Hanger
(Exclusively for 4Dimension Strut)

- Mechanically locks in place when used with 4Dimension SH hole pattern channel *
- Recommend a self-tapping set screw when used in 4Dimension solid channel or S hole pattern channel
- Requires hex nut for location placement on ATR
- Provides more usable area for trapeze application
- Sold in pieces (when used as trapeze hangers, two pieces are required)
- Loading Safety Factor: 2.5
- Zinc plated steel or Stainless Steel Type 316 (add SS6 to part number)
- Patent Pending

Part No.	Rod Size	Design Load Lbs. (kN)	Wt./C Lbs. (kg)
4D5000-3/8	3/8"-16	770 (3.42)	23.8 (10.79)
4D5000-1/2	1/2"-13	880 (3.56)	25.3 (11.47)

Design load when used in pairs as a trapeze solution.
Consult beam loading charts for channel loading.

Installation
(shown in the upright position)

Ensure both top and bottom lock tabs are bent to secure All Threaded Rod.
* Ensure the tab on the horizontal side is bent to engage in the SH slot.

Dimensions are in inches unless otherwise noted. Metric dimensions are in parentheses and are in millimeters unless otherwise noted.

4D5001 - 2-Piece Turn & Lock Trapeze Hanger
(Exclusively for 4Dimension Strut)

- Can be installed in any desired position on the ATR, helping eliminate the need to thread hex nuts up along ATR
- No additional hardware required
- Used in 'SH' slot with open face of channel facing up or down
- Interlocking/alignment tabs on top of part for easy assembly, installation, and adjustment
- Sold in pairs as shown below (one left side and one right side)
- When used as trapeze hangers, two sets are required
- Loading Safety Factor: 2.5
- Patent Pending

Left & Right Sides
(one pair as shown)

Note:
Not to be used in continuous open slot or solid dove-tail slot.

Consult beam loading charts for channel loading.

Installation

Dimensions are in inches unless otherwise noted. Metric dimensions are in parentheses and are in millimeters unless otherwise noted.

4D5100 - 2 Piece Strengthening Clamp
(Exclusively for 4Dimension Strut)

- For use on 4D22 channel only
- Shipped as one piece that can be snapped apart for installation
- Also designed to be used as a rod hanger
- Loading Safety Factor: 2.5
- Pre-Galv steel or Stainless Steel
Type 316 (add SS6 to part number)
- Patent Pending

Part No.	Thread Size	Wt./C
