

Posi-Lok™ Distribution Panels use lightweight, single conductor cables to provide the means for hurried personnel to quickly and safely connect and disconnect power systems without having to use any tools.

Applications:

- Posi-Lok™ Power Distribution Panels utilize single conductor cable that can be used to full amperage capability without the need to derate like multi-conductor solutions
- Ideal for disaster relief, temporary power, stand-by emergency power, and power distribution applications

Certifications and Compliances:

- UL Listed: E67181
- CSA certified: LR13963-48

Environmental Rating:

- NEMA 3

Features:

Cut-away view of E0400 male plug

11P Posi-Lok™ Connectors

Now there's no need to haul around huge, multi-conductor cables. Posi-Lok™ Power Distribution Systems let you use lighter, single conductor cables rated at higher amperages.

Posi-Lok™ Plugs feature recessed electrical contacts that are protected by shatter-resistant insulators and impact-resistant molded sleeves.

More than 25 years of field testing has proven that the unique elastomeric tapered insulator allows maximum flexing with minimum breakage. There are no metal clamps or grommets to cause cable failure.

The same plugs that connect to panels also connect to each other so that you can use long runs of cable. Polarity is assured because each plug is uniquely keyed and color-coded for easy, positive connecting.

Posi-Lok™ E0200 Series Female Panels and Male Plugs

Features:

- Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) standards
- Sequential interlock system requires the user to connect and disconnect each plug in sequence
- Polarized plugs and panels eliminate the possibility of cross-phasing
- Built-in strain relief reduces cable strain
- Proven Cam-Lok™ double cam principle provides a positive, vibration-proof connection
- No moving contact surfaces, eliminating arcing or burning of contacts
- Recessed contacts protected by insulating jacket that extends beyond contact ends for safety

Testing and Code Compliance:

- Listed to UL498, File No. E67181
- CSA certified to C22.2 No. 182.3-M1987, File No. LR13963

Material Characteristics:

- Insulator - TPE
- Polarizing shell - thermoplastic
- Temperature rating: -40°C to 105°C

Designed to meet Article 520-53 Section K and Article 530-22 Section A (NEC) standards, the built-in safety features require the user to connect or disconnect each plug in sequence. Protective receptacle covers cannot be raised until the preceding plug is locked into position.

Applications:

- Utilize single conductor cable that can be used to full amperage capability without the need to de-rate like multi-conductor solutions
- Ideal for disaster relief, temporary power, stand-by emergency power and power distribution applications

Certifications and compliances:

- UL Listed: E67181
- CSA certified: LR13963-48

Environmental rating:

- NEMA 3

Standard materials:

- Cable sizes #2 - 4/0
- Insulator – elastomeric
- Contact – copper

Electrical ratings:

- 600 volts
- 200 amperes continuous (E0200); 400 amperes continuous (E0400)

Temperature ratings:

- -40°C to 105°C

Features:

1 Safe, sequential interlock ensures ground mates first and breaks last

2 Limit switch capabilities

3 Reliable Posi-Lok cross-phase protection system ensures phase integrity

4 UL Listed and CSA certified

6 Quick and easy installation – panels can be mounted into a standard 19 inch rack

7 Shatter-resistant insulators and polarizing shells provide long-lasting, durable connectors

5 Lockout/tagout compatible for safety and security

8 Double set screw termination for added strength and quick installation (crimp also available)

9 Plugs are uniquely keyed and color-coded to eliminate cross-phasing
