

Arktite CSR non-metallic interlocked receptacles

UL and cUL Listed
Enclosure Type 3, 4, 4X, 12; IP66
Watertight
Corrosion-resistant

3P

Arktite® interlocked receptacles prevent engagement and disengagement of the plug under load, providing safe portable connections and extended product life.

Applications:

- Used to supply power to portable or fixed electrical equipment, such as welders, compressors, conveyors, portable tools, lighting systems and similar equipment
- Used in wet, damp or corrosive locations
- Used in hose down areas

Features:

- Compact enclosure is designed to fit into the web of an I-beam
- Heavy duty Arktite receptacle is compatible with existing Eaton's Crouse-Hinds series Arktite plugs of same rating and configuration
- Eaton's Bussmann series CubeFuse™ with indicator – the world's first "finger-safe" industrial power fuse
- Front mounted handle permits the interlocked receptacles to be easily mounted side by side or in tight spots
- Molded-in-place mounting feet require only four screws to mount the entire unit

Certifications and compliances:

- UL standards: UL508, UL1682
- Certified by UL to CSA standard: C22.2 Nos. 14, 182.1
- Enclosure Type 3, 4, 4X, 12
- IP66 enclosure

Standard materials:

- Enclosure – fiber-reinforced polyester
- Hardware – stainless steel
- Receptacle housing – aluminum
- Power contacts – naval brass
- Interlock mechanism – stainless steel
- Hubs – zinc

Standard finishes:

- Aluminum – Corro-free epoxy powder
- Brass – natural
- Stainless steel – natural

Options:

- | Description | Suffix |
|--|-------------|
| • Factory installed auxiliary contacts | S483 |
| • Special polarity..... | S4 |
- Interior rotated 22½° to right*

Threaded front cap ensures watertight rating while plug is not engaged

Locking ring on the APJ/NPJ Arktite plug threads onto the receptacle, providing positive, worry free power engagement and a watertight environmental seal

Satisfies OSHA lockout / tagout requirements

Field proven direct drive interlock provides positive locking action every time

Corro-free™ epoxy powder coated receptacle for even greater outdoor weatherability

Self-wiping, naval brass contacts in receptacle assure reliable performance and long dependable life

H.P. rated enclosed switch for motor load applications

Fused CSR offers a hinged cover for easy access when wiring or replacing fuses.

Eaton's Bussmann CubeFuse™ with indicator is fully rated for 30A and 60A at 600VAC. (Fuses not included.)

Innovative cover break line provides easy wiring access

Large rotary handle is easy to operate even with gloved hands

Corrosion, impact resistant enclosure offers Enclosure Type 4X, watertight, IP66 rating

Tongue in groove sealing system with continuous raised rib around enclosure ensures watertight and hosedown ratings
