

tradeSELECT[®]

FEATURES

- 4ft and 8ft lengths
- Switchable Lumen Technology
- Switchable CCT, 3500/4000/5000K
- Captive Lens/LED engine assembly
- 80+ CRI
- 0–10V dimming to 10%
- Surface mount on wall or ceiling
- Universal voltage (120–347V)
- Junction box cover included
- Field Installable behind-the-lens microwave sensor accessory

SPECIFICATIONS

OPTICS

- Frosted polycarbonate lens

INSTALLATION

- Fully assembled for quick installation

ELECTRICAL

- 50,000 hour LEDs at L90 for reduced maintenance

CERTIFICATIONS

- All luminaires are built to UL1598 standards and bear appropriate ETL labels
- Damp location label standard
- DLC[®] (DesignLights Consortium) Qualified. Please refer to the DLC website for specific product qualifications at www.designlights.org

WARRANTY

- 5 year warranty

Note	1. The result is based on 1.65M/60kg medium-size man walking toward sensor with speed of 0.8m/s in a vacant room. The sensor is hanging at 3M height. 2. It may have different performance if the test is delivered by different people, with different speed, at different height or in different conditions.		

SENSOR COVERAGE

This figure indicates maximum distance at the highest mounting height with 100% sensitivity

SENSOR FUNCTIONALITY

1. AUTOMATICALLY ON/OFF FUNCTION

Light comes on when the sensor detects movement and off after people leave at night.
Applications: Corridors and staircases.

With sufficient daylight, even when motion is detected, light remains OFF.

With insufficient daylight, when motion is detected, light turns ON.

After the last detection and the present hold time is elapsed, light turns OFF.

2. NO DAYLIGHT FUNCTION

The daylight threshold is set to "Disable"
Light comes on when it detects movement. After people leave, light goes off after a stand-by period.
Applications: Dim places such as basement parking or an underpass.

When motion is detected, the sensor will switch on the light to 100% brightness

After people leave the detection area, light remains at 100% brightness within the hold time

After the last detection and the present hold time is elapsed, light turns OFF.

3. FUNCTION DEMO - DIMMABLE CONTROL/CORRIDOR FUNCTION

With sufficient daylight, even when motion is detected, light remains OFF.

With insufficient daylight, when motion is detected, light turns ON.

After the last detection, the light will be dimmed down to the stand-by level (10%, 20%, 30% or 50%) after holdtime

After the stand-by period, light turns OFF

DIP Switch Setting

- Switch UP
- Switch DOWN

Factory Default Setting: All switches UP as shown

Stand-by dimming level

●	●	10%
●	○	20%
○	●	30%
○	○	50%

The definition of low output in the standby period.

Stand-by period

●	●	0s
●	○	30s
○	●	20min
○	○	+ ∞

The period of light keeping low output before it's completely switched off. When it's preset as "∞", the light always keep at low output if no movement in the detection area and doesn't turn off

Daylight Threshold

●	●	Disable
●	○	50lux
○	●	10lux
○	○	2lux

Definition of the ambient brightness; only when the ambient brightness is lower than preset specific lux amount, the sensor will work; when its preset as "disable", the sensor works every time it detects motion regardless of the ambient brightness

Hold-Time

●	●	5s
●	○	30s
○	●	1min
○	○	10min

The period of light keeping 100% brightness after moving objects leave the detection area.

Detection Area

●	100%
○	50%

In this area, movement will be detected and able to trigger the sensor. 100% detection area is also known as the strong sensitivity.
