

Honeywell

**The Average Person
Breathes 3,400 Gallons
of Air Each Day***

WHAT ARE YOU BREATHING IN?

When you breathe, air isn't all you're inhaling. Mold spores, pollen, bacteria, dust and other particles exist in virtually all indoor air.

When installed into your home's heating and cooling system, a Honeywell Whole-House Air Cleaner traps and filters airborne particles and contaminants passing through the duct system to make sure that cleaner air is distributed to all rooms within your home.

A Honeywell Whole-House Air Cleaner can also help maintain the performance of your furnace and air conditioner.

Get the benefits of a Whole-House solution for improving the air in your home.
