

Features and Benefits

- Used for indoor or outdoor use installations in areas subject to moisture or inclement weather.
- Silicone cover completely protects the switch from the elements.
- Cover can be used with any AC toggle or press action switch regardless of application.
- Clear bubble makes this plate ideal for use with lighted handle switches as it allows you to see the handle at all times.
- Easy to use since it does not require a door-type device to be lifted to activate the switch.
- This plate can be mounted to either FS/FD or standard type boxes providing versatility for many applications.

Other Hubbell Weatherproof Plates

1. For switches, Hubbell also makes a cast aluminum liftcover - order #7420.
2. For receptacles, Hubbell makes a complete offering of weatherproof plates in aluminum and corrosion resistant polycarbonate versions.

Installation Instructions

- **NOTICE:** For installation only by a qualified electrician in accordance with the National Electrical Code®, Canadian Electrical Code, local codes, and the following instructions.
- This plate is for FS/FD box mounting or against a smooth flat surface. When mounted against a smooth, flat surface, the plate must be secured to the switch using the screws provided.
- The mounting screws must be tightened to 6-10 lb.-in. (.7 - 1.2 N•m) torque to create a proper seal between the plate and the mounting surface.
- If the surface against which the plate is mounted is not smooth and flat, a bead of silicone based caulking compound must be used under the edge of the plate to assure a proper seal.
