

KWIKON NEW LARGER SIZES OF ANGLED STUBBY

NEW PRODUCT SHOWCASE

KWIKON® ENT 45° Angled Stubby NOW AVAILABLE in sizes up to 2"

IPEX is pleased to introduce our 45° Angled Stubby up to 2" to fit the larger sizes of Kwikon® ENT. Designed with an enlarged throat area, installation of PVC female adapters is made easy.

The KWIKON Angled Stubby eliminates the need for drilling holes in the plywood forms to create stubdowns. With our unique angled design, the ENT raceway maintains a low profile in the concrete pour allowing all sizes of Kwikon ENT to be used in most slabs. The 45° angled design allows Kwikon ENT to maintain a low profile in concrete slab and creates a smooth bending radius for easy pull-through of circuit wiring.

Features & Benefits:

- Pullout tab allows for ease of stubby removal after the concrete pour
- 'T' slot nail hole permits the head of the nail to pull through when the forms are removed
- Can create a 'stub-down' without drilling a hole in the wood form
- Enlarged inside throat area facilitates easy installation of PVC female adapters as required

| Size (inches) | Part Number | Product Code |
|---------------|-------------|--------------|
| 1/2 | KASTB-10 | 089233 |
| 3/4 | KASTB-15 | 089234 |
| 1 | KASTB-20 | 089235 |
| 1-1/4 | KASTB-25 | 089236 |
| 1-1/2 | KASTB-30 | 089238 |
| 2 | KASTB-35 | 089239 |
