

Hexagon Pinch Bar 24" x 25/32"

Used to lever and move objects into place with a lift and swivel motion. The hexagonal bar profile gives greater control and reduces bar roll. Forged from high-tensile carbon manganese steel for maximum strength. The heel is offset to 40° angle for optimum lifting.

Specifications

Overall Length:	24" (61 cm)	Body Diameter:	25/32" (20 cm)
End:	40°	Weight:	3.4 lb (1.5 kg)
