

The 8-Port Gigabit Switch is a structured wiring solution designed to meet the needs of today's bandwidth-intensive networking applications. After a plug and play installation, it is capable of transmitting gigabit-speed Ethernet through the network. |

Features & Benefits

Automatically runs at fastest possible speed on each port

9000 byte jumbo frames supported

Power supply not included. Recommended PW7760

Double bay module design fits perfectly into On-Q enclosures

Energy-Efficient Ethernet compliant (IEEE 802.3az)
