GFCI RECEPTACLES

MORE SOLUTIONS FOR MORE SAFETY

designed to be better.™

 **legrand**®

LEGRAND

KEEPS THE INNOVATIONS COMING

At Legrand, we've been providing real solutions to real problems for so long, it's almost second nature. From the world's first GFCI receptacle in 1971, to the introduction of ground-breaking SafeLock™ Protection some 30 years later, we've been delivering GFCI innovations designed to enhance safety, shorten installation times, and increase productivity for more than four decades.

Because of their proven effectiveness, GFCIs are required by code in numerous locations. We've made it our mission to offer intelligently designed solutions for every residential and commercial environment.

Whether the jobs call for receptacles, combination devices, portable, tamper-resistant, weather-resistant, RoHS-compliant, NAFTA-compliant, hospital grade, or specification grade — there's a reliable P&S GFCI innovation for you.

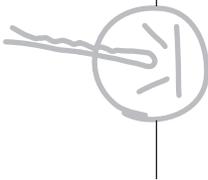

High-impact-resistant, thermoplastic construction for superior strength and durability.

Illumination life expectancy exceeds 20 years, eliminating the need to change bulbs.

The most durable GFCI available. Exceeds UL943 voltage surge requirements; survives 100x the required UL 3kA/6kV voltage surge test cycles.

LED nightlight turns ON at dusk and OFF at dawn automatically.

Trip indicator light makes it easy to identify a tripped condition.

Automatic shutter system prevents young children from inserting common household objects, but releases to accommodate plugs.

1595NLTTRWCC4

Two back-wire holes per termination add wiring flexibility, eliminate pigtailing, and save box space.

Ground terminal back-wire clamp for fast installation.

Patented SafeLock™ Protection — if critical components are damaged and ground fault protection is lost, power to receptacle is disconnected.

Prevents line-load reversal miswire: no power to the face or downstream receptacles if wired incorrectly.

FSUL Listed (Federal Specification WC596)

A safety solution for every home.

IT ALL COMES DOWN TO KEEPING PEOPLE SAFE.

That was our goal when we invented the first GFCI receptacle, and it remains our singular focus to this day. Our broad Pass & Seymour product line includes all the residential GFCI devices you'd expect from an industry leader, plus a number of truly innovative solutions designed to meet today's (and tomorrow's) special requirements.

1595TRW

Tamper-Resistant GFCI — helps keep children safe.

- Patented shutter system helps prevent insertion of foreign objects
- Patented SafeLock™ Protection — if critical components are damaged and ground fault protection is lost, power to receptacle is disconnected
- Meets *NEC*® requirements

1595SWTTRWCC4

Decorator Switch/GFCI Combination Devices — ideal for remodeling.

- User-preferred up-and-down switching combined with standard GFCI safety features
- Provides more function in single-gang opening
- Tamper-Resistant for added safety
- Ideal for bath and kitchen vent fans

1595TRRW

RoHS-Compliant GFCI — designed to meet environmental regulations.

- Meet all the requirements of the Restriction of Hazardous Substances regulations
- Provides the same functionality and protection as our traditional GFCI

1595NTLTRWCC4

Make nighttime navigation automatic.

Ideal for bathrooms, hallways, kitchens, stairs, nurseries, and more, this award-winning device delivers advanced safety and protection.

Tamper-Resistant Nightlight/GFCI combination — ensures safety and convenience.

- Sealed nightlight with Lexan® lens prevents tampering
- LED illumination with a 20+ year life expectancy means no bulbs to change
- Photocell turns nightlight ON in the dark — OFF in the daylight

OTHER SUGGESTED PRODUCTS

Single-Gang Flush Mount While-In-Use Covers

- Meet NEC® requirements for outdoor power
- Corner hinges enable horizontal or vertical installation

Weatherproof While-In-Use Covers

- Corner hinges enable horizontal or vertical installation
- Easy-opening one-finger latch

SPEED AND RELIABILITY ARE THE KEY to successful commercial installations. Our GFCIs are designed to meet those needs... and then some. That's because we've been offering GFCIs longer than anyone else, so we know what you need to do the job right the first time. Take a look at our innovative line — we'll think you'll find a solution that perfectly matches your needs. Every time.

PT2095NLTTR, PT2095W

2095W

P&S PlugTail™ GFCI — the fastest-installing GFCI ever. Period.

- Beats tough deadlines on any commercial job
- Patented plug and connector design enables simultaneous, one-click termination of all terminals
- No exposed terminals creates a finger-safe application before, during, and after installation
- Available in Spec Grade, Hospital Grade, Tamper-Resistant, and LED/Nightlight combinations

Specification Grade GFCI

- 20 amp designed for heavy commercial use
- High-impact-resistant, thermoplastic construction for superior strength and durability
- The most durable GFCI available. Exceeds UL943 voltage surge requirements; survives 100x the required UL 3kA/6kV voltage surge test cycles

Innovations that translate into faster commercial installations.

2095TRAW

2095HGNTLRW

2095TRNALA, PT2095HGNALA

Audible Alarm GFCI Receptacle

- Audible alert of tripped condition
- Ideal for areas where GFCI indicator light is not readily apparent
- Exceeds UL943 voltage surge requirements
- Withstands 100x the required UL 3kA/6kV voltage surge test cycles

Hospital Grade GFCI

- Meets rigorous requirements of Hospital Grade supplement of UL 498
- Available in Tamper-Resistant and LED/Nightlight combinations

NAFTA-Compliant GFCIs — designed to meet government regulations.

- GFCIs that meet the requirements of the Buy American provision of the American Recovery and Reinvestment Act
- Provides the same functionality and protection as our traditional GFCI
