

A simple dimming solution for you and your customers

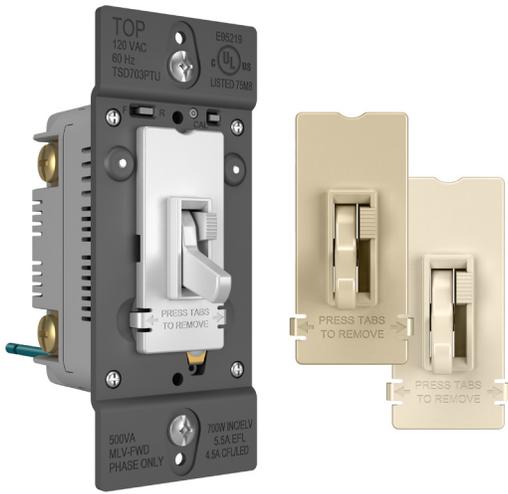

TSD703PTU*

Tru-Universal Dimmers do something today's dimmers don't: **they simply work** – with virtually any dimmable lamp, load, and fixture on typical residential and light commercial wiring (with the exception of 0-10V LED drivers).

Once a user selects the lamp type, the dimmer's self-calibrating technology automatically sets the minimum voltage of that lamp. That means no more flickering lights, no more frustrated customers and no more unnecessary callbacks. And because it's the one product in the category that lives up to its universal name, it dramatically reduces the number of SKUs as well.

Ideal for residential and light commercial applications, Tru-Universal Dimmers are the simple solution to all your customers' dimming challenges.

TSD703PTUW

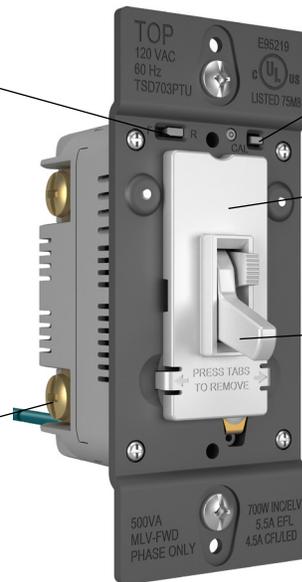

Features & Benefits

Forward or reverse phase

New aesthetically pleasing ergonomic design allows for easier operation

Constant memory returns lights to previous levels after a power failure

Screw-pressure-plate backwire terminals save time, space and money

TSD703PTUW

Self calibration feature allows users to select lamp type, which automatically sets the min voltage for that lamp, eliminating flickering and poor performance

Interchangeable face plates available in seven colors (TSDKIT*; sold separately)

Convenient operation – combines ON/OFF toggle switch with separate slider for dimming control

- Preset, Single Pole and 3-Way operation.
- Compatible with CFL/LED dimmable bulbs (with the exception of 0-10V LED drivers).
- Lifetime warranty.

3rd Party Compliance

cULus Listed, UL1472, CSA.
