From **standard** *to* **smart**

Legrand delivers a full spectrum of lighting controls that are simple to select, sell, install and use.

Prioritizing contractor-friendly features alongside customer-pleasing performance, our versatile solutions can fit every application without the complication of too many part numbers or too little compatibility. From standard dimming done right to smart devices with unmatched style, Legrand provides residential lighting controls to meet any need.

FEATURED LIGHTING CONTROL SOLUTIONS

A Better Take on the Basics:

TOGGLE SLIDE DIMMERS

Built around a user-tested ergonomic slide for easier, more precise control, this dimming solution – which includes LED/CFL (120V), low-voltage and Tru-Universal models –is an easy option for meeting the demands of today's complex dimming market to ensure energy savings.

An Easy Answer for Compatibility:

TRU-UNIVERSAL DIMMERS

Working with virtually any dimmable 120V bulb or fixture (excludes 0-10V) and usable for forward- or reverse-phase dimming, Legrand's Tru-Universal offering employs patented technology to support nearly all load types to self-calibrate for flicker-flicker performance. Available versions include standard, designer and smart devices.

Designer Collections for an Elevated Look:

LED & 0-10V DIMMERS, FAN CONTROLS, SENSORS AND TIMERS

The adorne® and radiant® devices deliver exceptional style alongside unique interface options and advanced features for touchless, automated, even smart control – all providing a truly superior user experience. Plus, creating a cohesive look throughout a project is easy, just add other designer switches and outlets from the same Collection.

The Smartest Way to Control Lights and Power:

ADORNE® AND RADIANT® WITH NETATMO

Leveraging the leading technology of Netatmo to optimize smart lighting control for whole-home use, the ultra-reliable adorne® and radiant® with Netatmo solutions support up to 98 smart devices – switches, dimmers, and/or outlets – using a single gateway. Options even include battery-operated devices for adding 3-way and 1-touch scene control without cutting or wiring. Also compatible with Amazon Alexa, Google Home, Apple HomeKit and third-party automation systems.
