

## CABLOFIL® BOX BRACKETS – Components to Make Pre-Fabrication Easy!

Versatile box brackets for every application. Cablofil® box brackets are available for walls, floors and for concrete block walls. Easy to use components make prefabrication of electrical assemblies for branch circuit wiring simple and cost effective. Cablofil box brackets in many cases are adjustable to fit multiple wall thicknesses and depths reducing the number of parts needed on the jobsite. Making Cablofil box brackets the perfect choice for projects with tight schedules.

### FEATURES

- Each component is designed to install quickly without modification and with simple attachment hardware
- Components are pre-galvanized for interior applications
- For use with 4" square and 4-11/16" boxes

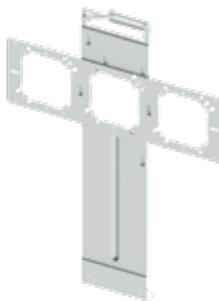

TELESCOPING BOX BRACKETS

CONCRETE WALL BRACKETS

PLASTER RINGS

## Versatility for any location.

### TELESCOPING BOX BRACKETS

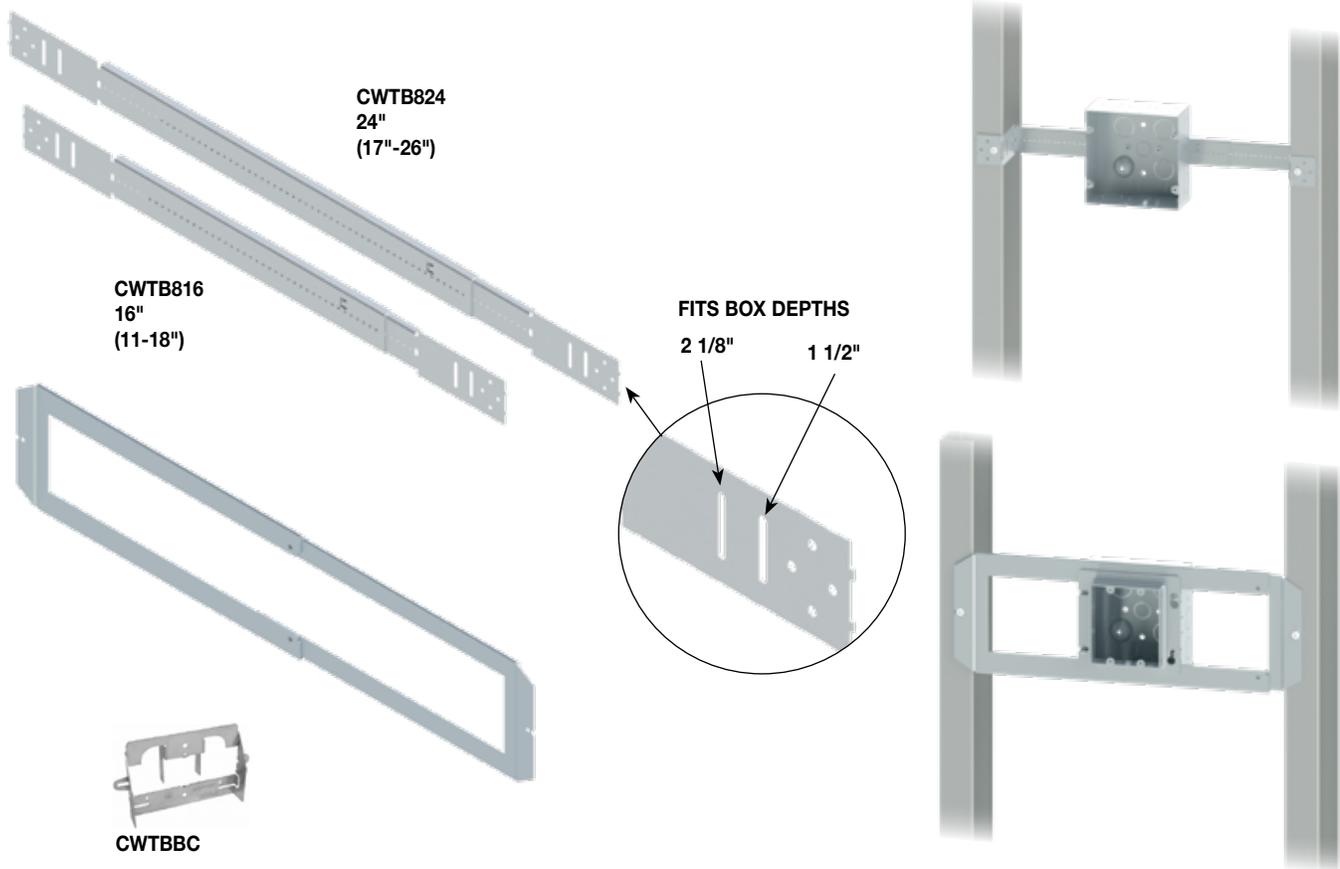

Available in two sizes, this sturdy bracket can be used for mounting boxes or for cable support. Openings allow for easy box mounting and mounting to the stud. End tabs easily fold to fit multiple box depths. The length is locked into place when the box is mounted using two screws (not supplied). These brackets offer offsets of 1-1/2" and 2-1/8".

### TELESCOPING BOX SUPPORT

For heavier loads or multiple box placements, this support is the answer. Fits 16" to 24" stud placements and anything in between – no cutting or field fabrication is needed. Any 4-11/16" box mounts from the back and is secured when the plaster ring is attached from the front side. Side-to-side adjustment is easy after mounting.

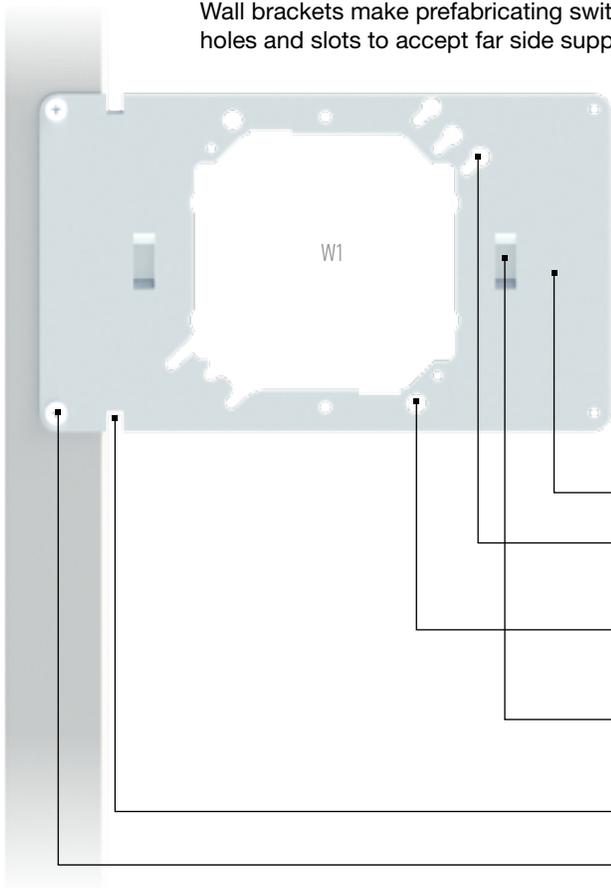

### ADJUSTABLE SLIDER BRACKET

Attaches to slider bracket for ease of repositioning of electrical boxes. Allows closer installation of multiple electrical boxes between studs. Ideal for pre-fab assemblies.

Wall brackets make prefabricating switch and outlet assemblies easy. The design includes mounting holes and slots to accept far side supports (sold separately).

**Construction:** 18 gage pre-galvanized steel. UL Listed.

**Prefabrication:** The design accepts 4" and 5" plaster rings and 4", 4-11/16" and 5" square boxes mounted horizontally or vertically.

**Installation:** Pre-drilled holes are provided for attachment screws to the studs. Far Side Support Arms attach to the back of the bracket to support the assembly against the wall behind. No attachment hardware is needed.

**Symmetrical design allows simpler and easier prefab**

**Keyhole Openings allow 4", 4-11/16" and 5" x 2-1/8" boxes to remain attached when plaster ring is removed**

**Counter Sunk Box Attachment Holes for 4-11/16" x 2-1/8" boxes allow 4" rings to be mounted independently**

**Support Arms are attached to the back of the bracket using the two slots provided**

**Stud alignment tabs - (W1, W34, W4 only)**

**Wall Bracket attachment holes**

- Wall brackets accept 4" and 5" plaster rings and 4", 4-11/16" and 5" square boxes mounted horizontally or vertically.
- Keyhole openings allow 4", 4-11/16" and 5" x 2-1/8" boxes to be mounted independently.
- Pre-drilled for attachment with screws to the studs.
- Built-in slots accept supports arms to brace the assembly against the wall behind. (sold separately)
- Sliding wall brackets with infinite box positioning are available for 16" to 24" stud widths.
- UL Listed.

\* 16" and 24" slider brackets allow electrical boxes to be adjusted horizontally

## Wall Bracket Accessories

### FIXED DEPTH SUPPORT ARMS

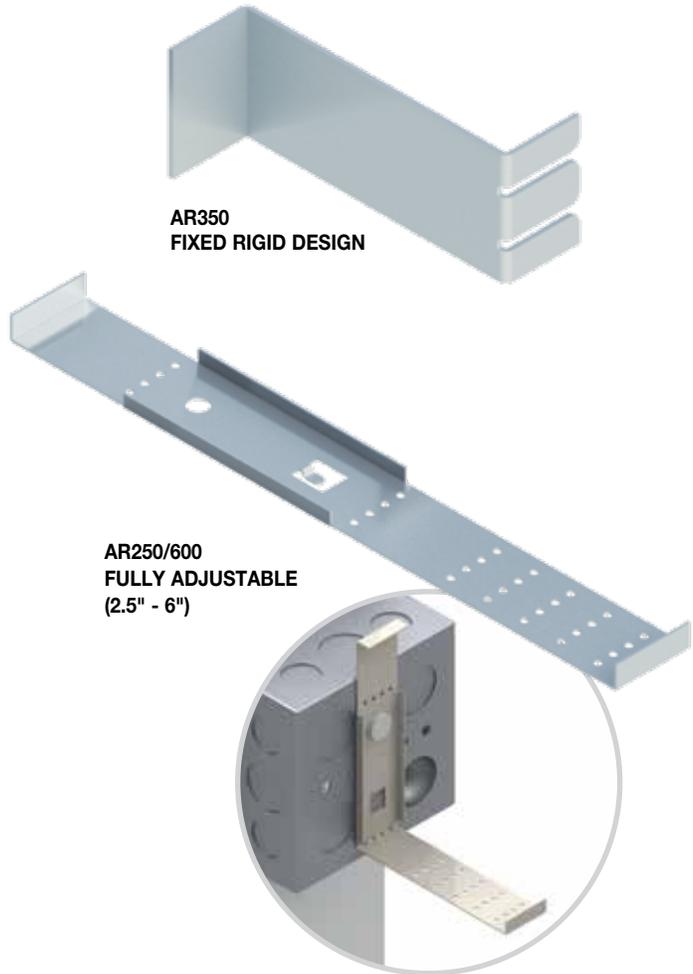

The FAS Power line includes 8 far side support arms for 2½" depth to 6½" walls. Each snap easily onto any of our floor or wall brackets.

**Construction:** 18 gage pre-galvanized steel

### ADJUSTABLE SUPPORT ARM

The Adjustable Far Side Support Arm is perforated to make it easy to fit any sized wall depth to stabilize FAS Power Floor and Wall brackets. Just use a pliers to adjust. The AR250/600 fits wall depths from 2½" to 6" and reduces engineering time for job sites with varied stud sizes and wall depths. AR250/600 works with 21/8" boxes on ly.

**Construction:** 18 gage pre-galvanized steel

**Designed for the challenges of concrete block walls.**

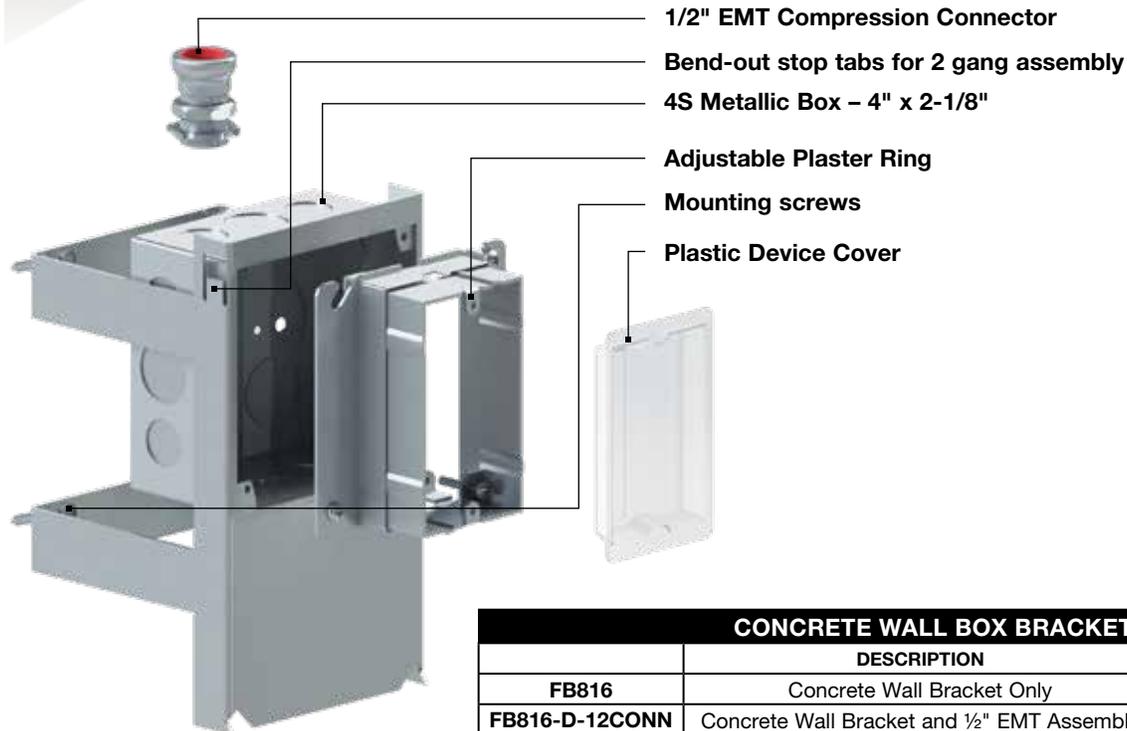

Box placement can be difficult when building concrete block walls, but the FB816 bracket keeps all wall boxes correctly placed during construction. The FB816 is a special bracket that can be securely mounted into the block cavity keeping the box in place while the mortar dries. Pre-assemble the bracket, box, plaster ring and conduit at rough in, and the assembly will stay perfectly in place.

**Construction:** 18 gage pre-galvanized steel.  
**ETL Listed. Patented design.**

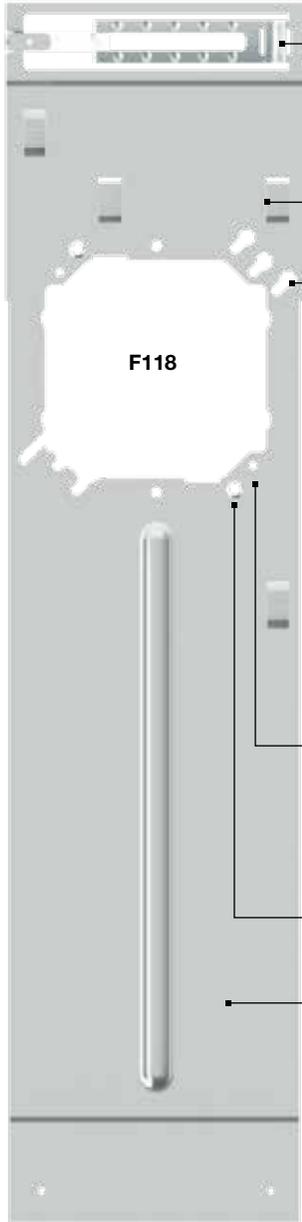

**Prefabrication:** Designed to hold a  
**4" x 2-1/8" metallic box.**

**Installation:** Pre-drilled holes are provided for mounting box and plaster ring attachment. After cutting the proper sized opening in the concrete block, position the assembly and tighten mounting screws within the block cavity to keep assembly in place during joint hardening process. All mounting hardware is included.

## Sizes to fit any project.

Cablofil floor brackets make it easy to prefabricate electrical assemblies for branch circuit wiring. It features an innovative built-in wire manager and it manages multiple-sized MC cable types so no attachment to the stud needed. The design permits fast installation anywhere between studs and ensures correct device mounting height without measuring. Other design features include predrilled mounting holes in the base and slots to accept far side supports (sold separately).

**Construction:** 18 gauge pre-galvanized steel. UL Listed.

**Prefabrication:** The design accepts 4" and 5" plaster rings and 4" and 4-11/16" square boxes mounted horizontally or vertically. A wire manager is built into the design of the base. Just detach, make a few bends with a pliers and slide in place.

**Installation:** The Floor Bracket is installed by kicking the lower flange under the wall plate. Two holes are provided for attachment screws if needed. Far Side Support Arms attach to the back of the bracket to support the assembly against the wall behind. No attachment hardware is needed.

Built-in Cable retaining feature accepts up to 6 MC cables

Support Arms attach to the back of the bracket using the two slots provided.

Keyhole Openings allow 4" or 4-11/16" x 2-1/8" boxes to remain attached even when plaster ring is removed

Attachment Holes for 4" rings allow 4-11/16" x 2-1/8" boxes to be mounted independently.

Attachment Holes for 4-11/16" x 2-1/8" boxes allow 4" rings to be mounted independently

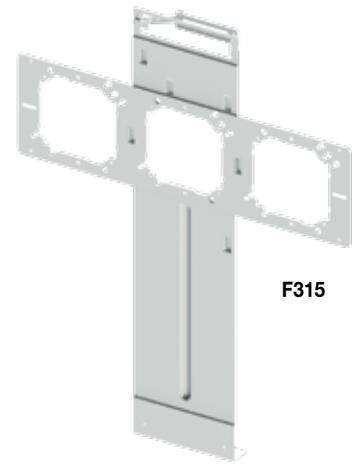

Multiple Box Heights are available from 12" to 24"

## Ceiling Hangers

Legrand has a complete line of ceiling hangers for acoustic ceiling applications. Many of these products can be installed without additional hardware with spring steel clip that secure conduit with a snap.

### T-GRID BOX HANGERS

These pre-galvanized hangers fit a 24" T-Grid to securely mount boxes and light fixtures in suspended ceilings.

T-GRID BOX HANGERS
