eFab™ by ABB

Make a smart investment in lean construction with cut-to-length Superstrut® channel.

Super fast. Super safe. Super cut. Superstrut®.

eFab™ is a lean construction service from ABB that focuses on helping contractors become more profitable by decreasing waste on jobsites, reducing labor, increasing operational efficiencies and helping create a safer work environment.

eFab™ products typically focus on preFabricated branch wiring systems, including Steel City® metallic boxes or Carlon® non-metallic boxes, for commercial and multi-family structures.

With state-of-the-art, high-speed technology, ABB has expanded its eFab™ services to include cut-to-length Superstrut® channel. Now you can order Superstrut® channel in 12- or 14-gauge pregalvanized steel in both A series (1 $\frac{5}{8}$ " x 1 $\frac{5}{8}$ "") and B series (1 $\frac{5}{8}$ " x 1 $\frac{3}{16}$ "") in any length you need from 1 ft. to 10 ft. as a standard instead of custom order. Solid channel is available in 1-inch increments, and half-slot channel is available in 2-inch increments. No more ordering 10-ft. standard lengths and cutting to installed length on the jobsite.

01

Benefits of cut-to-installed-length strut.

Improves speed of installation
Short lead time, and strut arrives ready to install.

Increases safety on the jobsite
Eliminates the potential hazards of workers cutting steel strut onsite.

Reduces waste
No short scrap pieces of strut paid for but unusable.

Saves on material handling and onsite inventory
Delivered just in time and all ready for installation.

Superstrut® pre-galvanized steel channel
