INSTALLATION INSTRUCTIONS

Typical Installation

Installation 1 - Illustrates two (2) CRBRDGBL being used side-by-side to provide bend radius support over an unused cabinet opening.

Installation 2 - Illustrates two (2) CRBRDGBL being used in a staggered orientation in adjacent cabinet openings. This configuration provides bend radius support for both cabinet openings that have cabling that exits in opposite directions and spans the unused portions of each opening.

Installation 3 - Illustrates four (4) CRBRDGBL being used to provide cable support over two (2) unused adjacent cabinet openings.
