## Door Bracket Installation

**Step 1: Install Door Bracket Base into cutout features on side panels using (2) #12-24 X 1/2" Screws.**

**Step 2: Install Door Bracket onto Door Bracket Base using (3) #12-24 X 1/2" Screws (only use (2) #12-24 X 1/2" Screws if installing 6" Door Brackets).**

**Note: When properly installed, Door Bracket Base will protrude through cutouts on inside of panel.**

**If material from Door Bracket cannot be touched or seen protruding through cutouts on inside of panel, then the Door Bracket is not properly engaged.**

**Material visible  
Brackets Engaged**

**Material not visible  
Brackets not engaged**

## Mounting of a *PATCHRUNNER* High Capacity Vertical Manager

Panduit recommends that the *PATCHRUNNER* High Capacity Vertical Manager be mounted such that the front face of the manager's panels are 1.25" forward of the front face of the rack it is attached to. However, other holes on the side panel of the manager and the channels of the rack are available so that the manager may be moved forward to accommodate applications which require a larger bend radius requirement.

**Standard  
Rack**

**6" Deep Steel  
Rack**

**4-Post Rack**

## Center Mounting of a *PATCHRUNNER* High Capacity Vertical Manager on Standard CEA Rack or 6" Steel Rack

After the first rack is mounted to the floor with the appropriate hardware, **Use Three 1/2-13x1.0" bolts** (supplied with the vertical cable manager panels) to fasten the *PATCHRUNNER* High Capacity Vertical Cable Manager to the rack. Next, mount the second rack to the other side of the *PATCHRUNNER* High Capacity Vertical Cable Manager using the remaining 1/2-13x1.0" bolts. Then mount the second rack to the floor using the appropriate hardware.

## Mounting of a *PATCHRUNNER* High Capacity Vertical Manager on a 4-Post Rack

After the first rack is mounted to the floor with the appropriate hardware, **Use Three 1/2-13x1.0" bolts** (supplied with the vertical cable manager panels) to fasten the *PATCHRUNNER* High Capacity Vertical Cable Manager to the rack. Next, mount the second rack to the other side of the *PATCHRUNNER* High Capacity Vertical Cable Manager using the remaining 1/2-13x1.0" bolts. Then mount the second rack to the floor using the appropriate hardware.

## Finger Installation

### Step 1:

Starting with bottom fingers, align tabs on base of finger with keyholes on side panel of manager. The cable retainers on the finger will be pointed upward,

### Step 2:

Apply outward pressure (from inside of manager) until plastic finger clicks into place.

### Step 3:

Repeat Steps 1 and 2 on remaining fingers.

### Removal/Replacement:

Use a flat-head screwdriver to release snaps at locations shown and apply inward pressure until finger is removed.

**Note:** For cleaning PANDUIT recommends using 'SIMPLE GREEN' all purpose cleaner (or local equivalent) and a lint free cloth

## FINGER REMOVAL

Apply inward pressure at finger ends to remove finger.

### Score Groove

## Equipment Mounting Instructions

1. Mount appropriate cage nuts to cage nut holes provided in center mounting brackets. Mounting to the cage nut holes on the bottom of a center mounting bracket to the holes on the top of the center mounting bracket directly below will meet the correct mounting requirement for CEA equipment.
2. Secure equipment using appropriate screws
