<u>specifications</u>

The 4 post telecommunications rack shall meet EIA/ECA-310-E standards, be 45 RU or 52 RU, constructed of steel and capable of accepting 19" wide EIA equipment. The equipment mounting rails shall have tapped #12-24 style mounting and shall have rack unit markings. The rack shall accept shelves and equipment brackets. The front and rear structural posts of the rack shall be capable of mounting NetRunner[™] or PatchRunner[™] Vertical Cable Managers and accessories, such as power outlet unit brackets. The construction method shall support up to 907kg (2000 lbs.) of equipment, cabling and ensure an electrically bonded structure for ease of grounding.

technical information

Dimensions:	Part Number	RU	Height in. (mm)	Width in. (mm)	Depth in. (mm)

Packaging: Package includes 4 post rack, assembly hardware, and installation instructions

key features and benefits

7 foot and 8 foot tall versions Allows maximum utilization of available vertical space

UL listed to 2000 lbs.	Heavy duty steel frame supports virtually any available equipment weights
Knock down design	Is shipped un-assembled in a smaller container than conventional 4 post racks for easier transfer on stairways and in elevators
Ecologically friendly	Smaller container means less cardboard than conventional 4 post rack packaging
Compatible with vertical cable managers	Compatible with PatchRunner [™] and NetRunner [™] Vertical Cable Managers on all 4 corners of the rack

*Add suffix 96 to the end of the part number for 8' part numbers.

applications

Panduit 4 post racks are designed to be an effective solution for the telecommunications room or network row. Available in 7 foot or 8 foot tall versions, these racks allow maximum equipment utilization for areas with either low or high ceilings. The rack can be used to manage high performance copper and fiber patch cables. This modular rack system is compatible with Panduit horizontal and vertical cable managers.

The open design allows for maximum airflow in and around the rack. This 4 post rack system is part of a complete rack and cable management system that manages, protects, and showcases your network investment.
