1 Start Here

1.1 Safety

Please use proper safety guidelines when installing Radiating Cable. This can be achieved by:

Cordoning-off the Working Area using:

- Warning Signs
- Warning Cones
- Warning Lights
- Warning Tape

Keeping Emergency Access and Emergency Routes Clear of:

- Materials
- Tolls
- Vehicles

Taking proper Fire Precautions by ensuring that easily inflammable materials should be:

- Kept to a minimum
- Disposed of immediately if not necessary
- Brought into the area only in the amount required

Caution: You must be able to complete the application without exposing personnel or equipment to unsafe or inappropriate working conditions.

2 Slot Orientation for Radiating Cables

Radiating Cable is constructed with slots. These slots must be oriented toward the area requiring coverage. The slots are located 180° opposite to an embossed line on the jacket.

The diagram below shows the electric field lines in various installations.

3 Installing Radiating Cable

The RC cable is mounted with hangers. A hanger should be mounted every 3 feet (1 meter). Every 33 feet (10 meters), the hanger should be fire resistant.

The recommended hangers are the Clip Handler (fire resistant) and Clic Clamp.

There are multiple installation options for the Clip Hanger and Clic Camp possible, depending on your environment. Contact ProSoft Technology for more information.

3.1 Installing the Clip Hanger

3.2 Installing the Clic Clamp

- 1 Drill a 6mm hole in insert the nylon plug into the wall.
- 2 Connect the Clic Clamp to the Spacer as shown.

4 Cable Termination

Radiating Cable must be terminated. Use ProSoft Technology part number RLX-LFTR-40 to terminate the cable.

5 Cable Hanging and Fixing

5.1 Bending RF Cables

Care should be taken when bending RF cables. The following diagram shows the right and wrong way to bend cable. Bending the wrong way may cause damage to the cable.

5.2 Connector Installation for Radiating Cables ½-inch

5.3 Radiating Cable Positioning in Tunnels

 No radiating cable in these areas

6 Support, Service & Warranty

6.1 Contacting Technical Support

ProSoft Technology, Inc. (ProSoft) is committed to providing the most efficient and effective support possible. Before calling, please gather the following information to assist in expediting this process:

- 1 Product Version Number
- 2 System architecture
- 3 Network details

If the issue is hardware related, we will also need information regarding:

- 1 Module configuration and associated ladder files, if any
- 2 Module operation and any unusual behavior
- 3 Configuration/Debug status information
- 4 LED patterns
- 5 Details about the serial, Ethernet or fieldbus devices interfaced to the module, if any.

Note: For technical support calls within the United States, an after-hours answering system allows 24-hour/7-days-a-week pager access to one of our qualified Technical and/or Application Support Engineers.
