Product Descriptions

EMA Series Surge Protective Devices

The Surgelogic™ EMA Series surge protective device (SPD) is a modular parallel device. The EMA device has multi-stage suppression circuits consisting of field-proven, fast-acting metal oxide varistors (MOVs).

A surge suppression path is provided for each mode, line-to-neutral (L–N), line-to-line (L–L), line-to-ground (L–G), and neutral-to-ground (N–G). Each surge suppression mode is individually fused and uses Thermal Cut-Off (TCO) circuitry to isolate the SPD and ensure shutdown in the event of MOV damage during severe overvoltages, even when operated on high-fault current power systems.

A filter provides EMI/RFI noise attenuation. On-line diagnostics continuously monitor the device status, and LEDs signal a loss of a suppression circuit. An audible alarm with an enable/disable feature and dry contacts are included in the standard diagnostic package.

EMA Series

EMA Design Features

- Voltage configurations include Wye, Delta and High Resistance Ground (HRG)
- External mounting next to panelboards, switchboards, switchgear, or motor control centers (MCCs)
- Individually fused suppression modes
- Thermal cutout
- Copper bus bar construction
- Push-to-test on-line diagnostic display
- Front panel alarm with enable/disable switch
- LED indicators indicate loss of a suppression mode, or fully operational circuit
- Up to 10 modes of protection
- Duty cycle tested (ANSI C62.41 C_{high}, 10 kA 20 kV) 20,000 impulses
- High-energy parallel design for ANSI/IEEE C62.41 and C62.45 category B and C applications.
- Short circuit current rating: 200 kA
- EMI/RFI filtering up to -42 dB (100 kHz to 100 MHz)
- Sine Wave Tracking (SWT) standard
- Increased SWT optional with up to -54 dB at 100 kHz
- Ten-year warranty
- cULus UL 1449 3rd Edition Listed
- cULus UL 1283 5th Edition Listed
- Nominal Discharge Current Rating: 20 kA

EMA Performance Features

EBA Series

EBA Series Surge Protective Devices (SPDs)

The Surgeloc™ EBA series surge protective device (SPD) is a modular brick parallel device. The EBA device has multi-stage suppression circuits consisting of field-proven, fast-acting metal oxide varistors (MOVs).

A surge suppression path is provided for each mode, line-to-neutral (L–N), line-to-line (L–L), line-to-ground (L–G), and neutral-to-ground (N–G). Each surge suppression mode is individually fused and uses circuitry with Thermal Cut-Off (TCO) to isolate the SPD and ensure shutdown in the event of MOV damage during severe overvoltages, even when operated on high-fault current power systems.

A filter provides EMI/RFI noise attenuation. On-line diagnostics continuously monitor the device status, and LEDs signal a loss of a suppression circuit. An audible alarm with an enable/disable feature and dry contacts are included in the standard diagnostic package.

EBA Design Features

- External mounting next to panelboards, switchboards, switchgear, or motor control centers (MCCs)
- Individually fused suppression modes
- Thermal cutout
- Push-to-test on-line diagnostic display
- Front panel alarm with enable/disable switch
- LED indicators indicate loss of a suppression mode, or fully operational circuit
- Up to 10 modes of protection
- Duty cycle tested (ANSI C62.41 C_{high}, 10 kA 20 kV) 20,000 impulses
- High-energy parallel design for ANSI/IEEE C62.41 and C62.45 category B and C applications.
- Short circuit current rating: 200 kA
- EMI/RFI filtering up to -42 dB (100 kHz to 100 MHz)
- Sine Wave Tracking (SWT) standard
- Increased SWT optional with up to -54 dB at 100 kHz
- Ten-year warranty
- cULus UL 1449 3rd Edition Listed
- cULus UL 1283 5th Edition Listed

Application Information

The effects of lightning and the damage caused by lightning-generated transients are well known. The failure of electronic equipment in a facility located in a high lightning area can easily be attributed directly to lightning-generated transients. Transient suppression can be installed on the power distribution system to address these externally generated transients. Lower magnitude surges generated within a facility and their effect on microprocessor-based equipment are less obvious than the transients induced by lightning. Inductive motors, pumps, electric welders, etc. generate smaller transients, but the repeated damage can cause equipment to malfunction.

A damaging transient voltage can enter a facility from several locations. The highest level of suppression should be provided at the service entrance. A second level of surge suppression should be provided at distribution points serving critical areas, for example, computer rooms, accounting areas, and laboratories. Other facility entry points that should be addressed include panels serving outdoor lights or outdoor equipment, such as motors.

Square D™ brand SPD products offered by Schneider Electric provide surge suppression at every level of the electrical distribution system.

Typical Applications:

- Banking
- Education
- Government
- Petrochemical
- Military
- Publishing
- Transportation
- Wastewater/Sanitation
- Medical
- Financial
- Telecommunications
- Automated Manufacturing
- Retail
- Utility
- Insurance
- Data Processing

NOTE: Refer to the product-specific catalog for information about internally mounted SPD devices.

Specifications for EMA and EBA SPDs

Description	
Relative Humidity	0 to 95% non-condensing
Operating Frequency	50/60 Hz
Storage Temperature	-40° to +149 °F (-40° to +65 °C)
Operating Temperature	-4° to +149 °F (-20° to +65 °C)
Standards	cULus UL 1449 3rd Edition, UL 1283 5th Edition, CSA C22.2 No. 8-M1986
Fusing	Individually-fused suppression modes (200 kAIR)

Dimensions and Weights

EMA/EBA Series

12 x 12 NEMA 1 / 3R / 12 Enclosures

Approximate Weight	22 lbs ± 2 lbs
Door Depth	0.5 in. [12.7 mm]
Total Depth	6.24 in. [158.5]

16 x 20 NEMA 1 / 3R / 12 Enclosures with Integral Switch, NEMA 4X Stainless Steel Enclosure with or without Integral Switch

Approximate Weight	31 lbs ± 7 lbs
Door Depth	0.5 in. [12.7 mm]
Total Depth	6.24 in. [158.5]

20 x 24 NEMA 1 / 3R / 12 Enclosures for 320 kA and 480 kA units with Integral Switch

Approximate Weight	56 lbs ± 2 lbs
Door Depth	0.5 in. [12.7 mm]
Total Depth	6.24 in. [158.5 mm]

12 inch (305 mm) and 20 inch (508 mm) Flush-Mount Collars

TVS12FMK

TVS20FMK

Approximate Weight	TVS12FMK	4.1 lbs
	TVS20FMK	6.3 lbs
Depth		1.01 in. [26 mm]
