Control stations for specific applications

- **General**

- Presentation of range *page 3/2*

- **Control stations for specific applications**

- XAPS key operated control stations..... *page 3/2*

General

Operating principle

XAPS control stations are fitted with a key operated lock and are designed to provide a starting or authorisation sequence by using the key. These control stations are supplied with 2 keys.
To prevent unauthorised operation (shorting of the contact block) or tampering, the stations are fitted with a special lock featuring a pre-determined key position (other than its withdrawal position) that only allows removal of the front cover by the key holder.

Environment

- Protection degree:
 - IP 54 conforming to standard IEC 60529,
 - IK 08 conforming to standard EN 50102.
- Conformity to standards: EN/IEC 60947-5-1.
- Electric shock protection: class I conforming to standard EN/IEC 61140.

Connection

- Screw clamp terminals (cross head screws slotted for 4 and 5.5 mm/0.16 and 0.22 in. screwdrivers).
- Cable entries:
 - 1 tapped entry for cable gland
 - 1 entry through the rear (Ø 17 mm/Ø 0.67 in. knock-out), with rubber cable grommet.
