

EDS CANopen TeSys T Readme

Modified February 26, 2018

EDS Compatibility

The following table describes the CANopen EDS file compatibility depending on the LTMR firmware version.

LTMR Firmware Version	EDS Compatible Version
FW 1.7	V01.01
FW 1.8	V01.01 or V01.08
FW 2.1 and above	V01.01 or V01.08 or V02.01

Network Compatibility

EDS file versions V01.01, V01.08 and V02.01 can all be used simultaneously in the same CANopen network configuration software.

Updates and Troubleshooting:

LTMR firmware version details are accessible through SoMove software with TeSys DTM, Magelis HMI, LTMCU, or through communications network reading Modbus register 76 (CANopen address 2000 : 4D).

To manage incompatibility between a newer EDS file and older firmware, take one of the following actions to solve the issue:

- use the EDS file version compatible to the firmware
- update the device firmware compatible with the EDS file version.
