

Mini Power-Zone

A fully integrated power supply

Maximize your space

With its uniquely compact design, the Mini Power-Zone unit substation is the ideal solution for rooms and facilities with limited space, such as small shopping centers or crowded warehouses. All models house a Square D low voltage transformer and circuit breaker distribution panel in a single, wall-mounted substation, providing a compact solution that saves time, cost, and floor space.

Key features

The Mini Power-Zone provides an integrated package for single- or three-phase power solutions and houses the following in a single, wall-mounted substation:

- Conduit connected main breaker
- Epoxy resin encapsulated transformer
- Secondary main breaker
- Distribution panelboard
- 600 V and below, 3-30 kVA

A portable, compact power supply designed for small loads, the Mini Power-Zone can be used across a wide array of market segments. Typical applications include areas with limited space such as retail chains, shopping centers, crowded warehouses, food services and retail, gas stations, and commercial and industrial buildings.
