|---|--------------------------|--|
| Electrical data   |                          |  |
| Design of the sensor  | Motor encoder DRIVE-CLiQ |  |
| Test voltage, rms Signal conductors                             | 500 V                    |  |
| Rated voltage U0/U in accordance with EN 50395 Power conductors | 30 V                     |  |
| Mechanical data   |                          |  |
| Type of connection cable engine side                            | RJ45 DRIVE-CLiQ          |  |
| Type of connection cable converter side                         | DRIVE-CLIQ RJ45          |  |
| Maximum cable outer diameter                                    | 7.1 mm                   |  |
| Smallest bending radius (fixed installation)                    | 35 mm                    |  |
| Smallest bending radius (flexible installation)                 | 75 mm                    |  |
| Number of bends, max.   | 10,000,000               |  |
| Maximum traversing velocity                                     | 300 m/min                |  |
| Acceleration horizontal, max                                    | 50 m/s²                  |  |
| Tensile stress, max. Fixed installation                         | 50 N/mm²                 |  |
| Tensile stress, max. Flexible installation                      | 20 N/mm²                 |  |
| Torsional stress  | Absolute 30°/m           |  |
| Length  | 5.0 m                    |  |
