

SIMATIC ET 200SP, Analog input module, AI Energy Meter 480V AC ST, suitable for BU type D0, channel diagnostics

| General information              |                           |
|----------------------------------|---------------------------|
| Product type designation         | AI Energy Meter 480VAC ST |
| Firmware version                 | V4.0                      |
| • FW update possible             | Yes                       |
| usable BaseUnits                 | BU type D0                |
| Supported power supply systems   | TT, TN                    |
| Product function                 |                           |
| • Voltage measurement            | Yes                       |
| — without voltage transformer    | Yes                       |
| — with voltage transformer       | Yes                       |
| • Current measurement            | Yes                       |
| — without current transformer    | No                        |
| — with current transformer       | Yes                       |
| — With Rogowski coil             | No                        |
| — With current-voltage-converter | No                        |
| • Energy measurement             | Yes                       |
| • Frequency measurement          | Yes                       |
| • Power measurement              | Yes                       |

|  |   |
|--|---|
| • Active power measurement                               | Yes                                       |
| • Reactive power measurement                             | Yes                                       |
| • Power factor measurement                               | Yes                                       |
| • Active factor measurement                              | No  |
| • Reactive power compensation                            | No  |
| • Line analysis  | No  |
| • I&M data   | Yes; I&M0 to I&M3                         |
| • Isochronous mode                                       | No  |
| <b>Engineering with</b>                                  |   |
| • STEP 7 TIA Portal configurable/integrated from version | V13 SP1                                   |
| • STEP 7 configurable/integrated from version            | V5.5 SP4 and higher                       |
| • PROFIBUS from GSD version/GSD revision                 | GSD Revision 5                            |
| • PROFINET from GSD version/GSD revision                 | V2.3                                      |
| <b>Operating mode</b>                                    |   |
| • Cyclic measured value access                           | Yes                                       |
| • Acyclic measured value access                          | Yes                                       |
| • Fixed measured value sets                              | Yes                                       |
| • Freely definable measured value sets                   | Yes                                       |
| <b>CiR - Configuration in RUN</b>                        |   |
| Reparameterization possible in RUN                       | Yes                                       |
| Calibration possible in RUN                              | Yes                                       |
| <b>Installation type/mounting</b>                        |   |
| Mounting position  | any                                       |
| <b>Supply voltage</b>                                    |   |
| Design of the power supply                               | Supply via voltage measurement channel L1 |
| Type of supply voltage                                   | AC 100 - 277 V                            |
| permissible range, lower limit (AC)                      | 90 V                                      |
| permissible range, upper limit (AC)                      | 293 V                                     |
| <b>Line frequency</b>                                    |   |
| • permissible range, lower limit                         | 47 Hz                                     |
| • permissible range, upper limit                         | 63 Hz                                     |
| <b>Power loss</b>  |   |
| Power loss, typ.   | 0.6 W                                     |
| <b>Address area</b>                                      |   |
| <b>Address space per module</b>                          |   |
| • Inputs   | 256 byte                                  |
| • Outputs  | 12 byte                                   |
| <b>Hardware configuration</b>                            |   |
| Automatic encoding                                       | Yes                                       |

|   |  |
|---|--|
| • Mechanical coding element                                   | Yes  |
| Selection of BaseUnit for connection variants                 |  |
| • 2-wire connection   | BU type D0, BU20-P12+A0+0B   |
| Time of day   |  |
| Operating hours counter                                       |  |
| • present   | Yes  |
| Analog inputs   |  |
| Cycle time (all channels), typ.                               | 50 ms; Time for consistent update of all measured and calculated values (cyclic und acyclic data)  |
| Cable length  |  |
| • unshielded, max.  | 200 m  |
| Analog value generation for the inputs                        |  |
| Measurement principle   | Sigma Delta  |
| Sampling frequency, max.                                      | 1 024 kHz  |
| Interrupts/diagnostics/status information                     |  |
| Alarms  |  |
| • Diagnostic alarm  | Yes  |
| • Limit value alarm   | Yes  |
| • Hardware interrupt  | Yes; Monitoring of up to 16 freely selectable process values (exceeding or undershooting of value) |
| Diagnostics indication LED                                    |  |
| • Monitoring of the supply voltage (PWR-LED)                  | Yes  |
| • Channel status display                                      | Yes; green LED   |
| • for channel diagnostics                                     | Yes; red Fn LED  |
| • for module diagnostics                                      | Yes; green/red DIAG LED  |
| Integrated Functions  |  |
| Measuring functions   |  |
| • Measuring procedure for voltage measurement                 | TRMS   |
| • Measuring procedure for current measurement                 | TRMS   |
| • Type of measured value acquisition                          | seamless   |
| • Curve shape of voltage                                      | Sinusoidal or distorted  |
| • Buffering of measured variables                             | Yes  |
| • Parameter length  | 74 byte  |
| • Bandwidth of measured value acquisition                     | 2 kHz; Harmonics: 39 / 50 Hz, 32 / 60 Hz   |
| Measuring range   |  |
| — Frequency measurement, min.                                 | 45 Hz  |
| — Frequency measurement, max.                                 | 65 Hz  |
| Measuring inputs for voltage                                  |  |
| — Measurable line voltage between phase and neutral conductor | 277 V  |

|   |  |
|---|--|
| — Measurable line voltage between the line conductors                             | 480 V  |
| — Measurable line voltage between phase and neutral conductor, min.               | 90 V   |
| — Measurable line voltage between phase and neutral conductor, max.               | 293 V  |
| — Measurable line voltage between the line conductors, min.                       | 155 V  |
| — Measurable line voltage between the line conductors, max.                       | 508 V  |
| — Internal resistance line conductor and neutral conductor                        | 3.4 MΩ   |
| — Power consumption per phase   | 20 mW  |
| — Impulse voltage resistance 1,2/50μs   | 1 kV   |
| — Measurement category for voltage measurement in accordance with IEC 61010-2-030 | CAT II; CAT III in case of guaranteed protection level of 1.5 kV |

#### Measuring inputs for current

|  |  |
|--|--|
| — measurable relative current (AC), min.                       | 1 %; Relative to the secondary rated current 5 A   |
| — measurable relative current (AC), max.                       | 100 %; Relative to the secondary rated current 5 A |
| — Continuous current with AC, maximum permissible              | 5 A  |
| — Apparent power consumption per phase for measuring range 5 A | 0.6 V·A  |
| — Rated value short-time withstand current restricted to 1 s   | 100 A  |
| — Input resistance measuring range 0 to 5 A                    | 25 mΩ; At the terminal                             |
| — Surge strength   | 10 A; for 1 minute                                 |
| — Zero point suppression                                       | Parameterizable: 2 ... 250 mA, default 50 mA       |

#### Accuracy class according to IEC 61557-12

|                                     |                                   |
|-------------------------------------|-----------------------------------|
| — Measured variable voltage         | 0,2                               |
| — Measured variable current         | 0,2                               |
| — Measured variable apparent power  | 0.5                               |
| — Measured variable active power    | 0.5                               |
| — Measured variable reactive power  | 1                                 |
| — Measured variable power factor    | 0.5                               |
| — Measured variable active energy   | 0.5                               |
| — Measured variable reactive energy | 1                                 |
| — Measured variable neutral current | 0.5; calculated                   |
| — Measured variable phase angle     | ±1 °; not covered by IEC 61557-12 |
| — Measured variable frequency       | 0.05                              |

#### Potential separation

##### Potential separation channels

- between the channels
- between the channels and backplane bus

No  
Yes; 3 700V AC (type test) CAT III

## Isolation

Isolation tested with 2 300V AC for 1 min. (type test)

## Ambient conditions

### Ambient temperature during operation

- horizontal installation, min. 0 °C
- horizontal installation, max. 60 °C
- vertical installation, min. 0 °C
- vertical installation, max. 50 °C

### Altitude during operation relating to sea level

- Ambient air temperature-barometric pressure-altitude On request: Ambient temperatures lower than 0 °C (without condensation) and/or installation altitudes greater than 2 000 m

## Dimensions

|        |       |
|--------|-------|
| Width  | 20 mm |
| Height | 73 mm |
| Depth  | 58 mm |

## Weights

Weight, approx. 45 g

## Other

### Data for selecting a voltage transformer

- Secondary side, max. 296 V

### Data for selecting a current transformer

- Burden power current transformer x/1A, min. As a function of cable length and cross section, see device manual
- Burden power current transformer x/5A, min. As a function of cable length and cross section, see device manual
