LED Warehouse Industrial Lighting - 2 Ft Compact High Bay SPEC SHEET

0-10*
Dimmable

Simply Install and Enjoy the Savings!

Our compact linear LED high bays are a high performance, cost-effective solution for lighting warehouses, distribution centers and manufacturing facilities. Available with standard 0-10V dimming capability, these DLC qualified fixtures deliver on performance and are suitable for mounting heights of up to 25 feet. Featuring compact 2 ft length, universal input voltage, prismatic lens, 50K hour life, and a 10 year warranty.

*Optional Wire Guard,
Surge Protector and
Occupancy Sensor*

FEATURES

- Replacement for fluorescent or HID warehouse lighting
- Steel housing with UV resistant powder coat finish
- Equipped with heat resistant frosted acrylic lens
- Mounting includes V hook, chain or pendant mount
- Optional wire guard
- UL Type IC

APPLICATIONS

- Warehouse & industrial lighting, gymnasiums
- Big box retailers

LED Warehouse Industrial Lighting - 2 Ft Compact High Bay

SPEC SHEET

GENERAL SPECIFICATIONS

Input Voltage: 120-277V
Dimmable: 0-10V*
Sink Current: 2mA Max
Functional Life (L70): 50,000 hours
Efficacy: 130
THD: <20%
Power Factor: >.9
Beam Angle: 120°
CRI: 80
Ambient Operating Temp: -20°C to 45°C

Item #	A	B	C	D	Weight (lbs)

F=Fixture / LHB80=Linear High Bay 80W / 50K=5000K / F=Frosted

*Dimming with standard 0-10V dimmer, such as Leviton IP710, DS710 or Lutron DVSTV

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Fixture may not be compatible with all dimmers. Visit www.topaz-usa.com for up-to-date dimmer compatibility information. Specifications subject to change without notice.

WARNING: Some products included in this specification sheet may be subject to the warning requirements of California's Proposition 65. Please refer to your product packaging for more information.

For absolute test reports, CUs are expressed as a percentage of total lumen output. Calculations were based on published IES procedures, and are based on the zonal cavity method. Basic assumptions: 1) Room surfaces are lambertian reflectors. 2) Incident flux on each surface is uniformly distributed. 3) The room is spectrally neutral. When luminaires are not evenly distributed throughout the room, or do not exhibit lateral symmetry, CU values may differ from actual performance.
