## EDS Factory Sealed Tumbler Switches

## Explosionproof, Dust-Ignitionproof

## UNILETS'"' for Use with Threaded Metal Conduit.

## NEC/CEC:

Class I, Division 1 and 2, Groups B *, C, D
Class II, Division 1 and 2, Groups E, F, G
Class III
NEMA 3, 7 B $\bullet$ CD, 9EFG

## Applications

- Designed to prevent arcing of enclosed switches in ignitable atmospheres during connect and disconnect operation of lighting and light power loads.
- For use in classified areas where ignitable vapors, gases or highly combustible dusts are present.
- For installation in:
- Chemical plants
- Petrochemical plants
- Refineries
- Other process industries

## Features

- Enclosures have external mounting lugs for ease of mounting.
- Smooth, rounded integral bushing in each hub protects conductor insulation.
- Enclosures furnished with internal ground screw.
- 20 Amp and 30 Amp units available for use with 120-277 Vac.
- Factory sealed switches are designed to a UL Standard so that any arcing devices are contained within an explosionproof labyrinth switch (standard switch and sealing chamber on select models). Tumbler switch devices are approved for installation without additional external sealing fittings.
- $1 / 2^{\prime \prime}$ and $3 / 4$ " 1 -gang units suitable for Class I, Group B, in addition to Class I, Groups C and D; Class II, Groups E, F and G; and Class III.
- 20 Amp 4-way and all 30 Amp models utilize a switch enclosed in separate sealing chamber. Smooth double-face, accurately ground surfaces on sealing chamber flange mate with cover and body to provide positive flame-tight construction.
- Sealing chamber has prewired factory sealed pigtail leads to switch.
- Corrosion resistant, strong stainless steel hex head cap screws attach cover/body/sealing chamber assembly for approved flame-tight construction.
- Threaded stainless steel operating handle provides positive Corrosion resistant operation.
- Choice of front-operating or side rocker arm handle-each may be locked in ON or OFF position.

## Standard Materials

- Body and cover: malleable iron
- Sealing chamber (on select models): copperfree ( $4 / 10$ of $1 \%$ max.) aluminum
- Handle: nylon $6 / 6$
- Optional nameplate mounting bracket: corrosion resistant stainless steel

## Standard Finishes

- Tumbler switches: triple-coat-(1) zinc electroplate,
(2) chromate, and (3) epoxy powder coat

## Explosionproof, Dust-Ignitionproof

## UNILETS'" for Use with Threaded Metal Conduit.

NEC/CEC:
Class I, Division 1 and 2, Groups B \&, C, D
Class II, Division 1 and 2, Groups E, F, G
Class III
NEMA $3,7 B \diamond C D, 9 E F G$

## Options

- 1- or 2-gang copperfree (4/10 of 1\% max.) aluminum bodies and covers (1) available. Add suffix - A.
- NPBRKT nameplate mounting bracket to make circuit description/identification easy.
- Pre-drilled holes in bottom of bracket allow direct mounting to control stations with existing cover bolts.
- Pre-drilled holes in middle of bracket allow mounting of customer's circuit identification nameplate; epoxy glue may also be used for mounting (phenolic nameplate not included)
- Bracket eliminates costly field installation of drilling and tapping to accommodate circuit identification nameplate.
- Brackets fit side-by-side on 2-, 3- and 4-gang boxes and 3-devices.

## Standard Materials

- Body and cover: malleable iron

## NEC/CEC Certifications and Compliances

- UL Standards: UL 894, UL 1203
- UL Listed: E10523, E81751
- cUL Listed: E81751, E810523

## Ordering Information for "Custom" Units

- Devices, covers and bodies may be ordered separately so that a different EDS chamber/switch assembly may be used in each gang.
- Order components separately as follows:
(1) select mounting body catalog number,
(2) select cover catalog number with desired switch operation (1-pole, 2-pole, 3-way or 4-way).

## How to Order Hub Arrangements

- Simply send sketch indicating sizes and locations for brazed hubs on body or bodies selected from catalog listings. Orient sketch so that cover opening faces front and mounting lugs face upward and downward (box wall opposite cover should be referred to as the back of box).

## Bodies and Hubs Available

- Tumbler switches may be ordered in single thru five gang deep malleable iron blank bodies with brazed hubs as specified at any location.
- Tumbler switches may be ordered with tandem malleable iron boxes with additional brazed hubs as specified.
- Standard malleable iron single and 2-gang tumbler switches may be ordered with additional brazed hubs as specified.
- Single and 2-gang tumbler switches may be ordered with aluminum boxes with additional brazed hubs as specified.

## Related Products

- For classified-location push button, pilot light and selector switch control stations, see EFD/EFDB and EDS Control Stations and Pilot Lights.
- Indicates items which are suitable for Class I, Group B, as well as Class I, Groups C and D; Class II, Groups E, F, G; and Class III. See product selection pages for suitable items.
(1) Aluminum rocker arm cover is not available.

Blank Bodies for Brazed Hubs
Construct complete catalog numbers per EFD Cast Device Boxes Ordering Information on following page. Hubs will be located in center of walls and evenly spaced unless otherwise specified. Where spacings are critical, submit sketch showing exact spacing requirements.

| 1-Gang | EFD1NL |
| :--- | :--- |
| 2-Gang | EFD2NL |
| 3-Gang | EFD3NL |
| 5-Gang | EFD4NL |

(1) For tandem bodies, external seals must be installed within 1.5 meters ( 5 feet) of each conduit entrance for Class I, Groups $C$ and $D$.

## EDS Factory Sealed Tumbler Switches

## Blank Bodies for Brazed Threaded Hubs

Single, Two, Three, Four and Five Gang Boxes. Brazed Threaded Hubs for Rigid Conduit, $1 / 2^{\prime \prime}$ thru 1"; Brazed Union Hubs, $1 / 2^{\prime \prime}$ thru 1".
NEC/CEC:
Class I, Division 1 and 2, Groups C, D
Class II, Division 1 and 2, Groups E, F, G
Class III
NEMA 7CD, 9EFG

## Cast Device Box Ordering Information

Determine catalog number as follows:
(1) Select EFD device box catalog number;
(2) Select "Standard Hub Arrangement Diagram" number; and
(3) Select symbols that represent hub sizes from "Symbol Table." (Use "0" where no hub is required, and separate the various divisions of the complete catalog number by dashes.)

## Example

The blank body device box selected is EFD3NL and the hub arrangement is diagram \#8. Hub "a" is to be $3 / 4$ " brazed threaded; hub "b", 1" brazed threaded; hub "c", 3/4" brazed threaded; hub "d", no hub is required; and hub "e", 1 " brazed union.
The complete catalog number will be: EFD-3NL-8-23203E

If a "Standard Hub Arrangement" is not suitable for the application, or when hubs are to be more accurately spaced, submit sketch locating hubs (1) from centerlines of walls and (2) from outside back of box (or from mounting lug surface if lugs are supplied).

All hubs will be located in centerlines of walls and evenly spaced unless otherwise specified.

$\left.\begin{array}{ccc}\text { Symbol Table }\end{array}\right]$| Hub Size <br> (Inches) | Breaded Hub <br> Symbol | Brazed Union <br> Hub Symbol |
| :---: | :---: | :---: |
| Blank | 0 | 0 |
| $1 / 2$ | 1 | 1 E |
| $3 / 4$ | 2 | 2 E |
| 1 | 3 | 3 E |
