TRAP-TITE™

FLOOR DRAIN TRAP SEAL™

LETS WATER FLOW DOWN
KEEPS BUGS & ODORS OUT

THE PROBLEM

THE TRAP-TITE SOLUTION

The Trap-Tite Trap Seal is designed to be used in conjunction with a code approved trap seal (often referred to as a P-trap) in drainage systems including floor drains. Trap-Tite is available in four sizes: 2", 3", 3.5" and 4".

Typical applications for the Trap-Tite include 2", 3", 3.5" and 4" floor drains, basement drains, mop sink drains, and other types of drains used in maintenance areas. The Trap-Tite blocks harmful sewer gases and/or pests from entering a finished building space in the event that the P-trap is not sealed with an appropriate amount of liquid.

NOTE:

- A. This barrier type floor drain trap seal protection device is not for use as a primary trap seal.
- B. This product should not be removed from the packaging until it is to be installed.
- C. Installation should be conducted in accordance with all local codes.
- D. Trap-Tite inline trap seal device shall not be used in lieu of a trap primer.

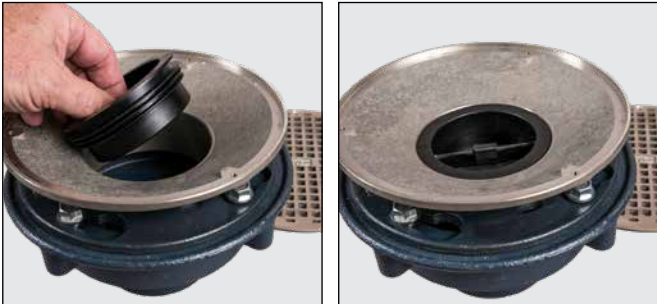

NEW CONSTRUCTION:

Remove drain barrel/strainer from the drain base and gently push Trap-Tite into the hub of the drain. Replace the drain barrel/strainer.

RETROFIT:

Remove the strainer from the drain barrel and gently insert Trap-Tite into the barrel, making sure the strainer can be replaced without touching the Trap-Tite.
