3M™ Cold Shrink Silicone Rubber Splices QS-III

Easy Installation.  
High reliability.

**3M**

# Revolutionizing power cable splicing with Cold Shrink

The 3M™ Cold Shrink Silicone Rubber Splice QS-III is designed to meet customer demands for easy, consistent installations by virtually eliminating the pushing, pulling or heating required by traditional splices. The QS-III splice features a silicone rubber body which provides excellent electrical properties and superior low temperature handling. Plus the QS-III splice meets or exceeds the requirements of most worldwide standards including IEEE 404 and European CENELEC HD629.

## **3M Cold Shrink products bring tested reliability to splicing.**

3M invented Cold Shrink technology over 40 years ago, so no one knows more about it than we do. The merits and reliability of Cold Shrink products have been proven with years of successful field use and laboratory testing.

3M QS-III splices eliminate heat applied and force fit methods, resulting in safer, more reliable, and lower cost installations.

## **Cold Shrink Benefits**

- No heat, flames or special installation tools required
- Constant radial pressure enables consistent electrical interfaces
- Easy, fast and safe installation
- Symmetrical cable cutback dimensions
- Allows transitioning of different size cables
- Suitable for use with most industry-standard connectors

## Splice Features

- Silicone body provides excellent electrical performance and superior low temperature handling
- Splice bodies are 100% factory tested
- One piece splice body design
- Field-proven technology
- Meets IEEE 404, Cenelec, and European VDE standards
- Wide cable range for individual splice bodies
- Allows easy size transitions within a splice range

3M™ Cold Shrink Silicone Rubber Splices QS-III come with the components required to make a complete splice for most types of cable and voltages from 5-46 kV.

For CN (concentric neutral) or JCN (jacketed concentric neutral) type shielded cables, there are two types of QS-III splice kits.

The 5400A series splice kits come with the splice body, a separate one-piece re-jacketing tube and the components necessary to splice one cable. The kits can be ordered with or without a connector.

The 5400A-WG series splice kits also are for CN or JCN cables. These splice kits have splice bodies, bleeder wires and protective jacket tubes, all loaded on one core for ease of installation and minimal re-jacketing. The components, except connectors, necessary to splice one cable are included in the kit.

## 3M™ Cold Shrink Silicone Rubber Splice QS-III

-------	----------	---------------------------	--	------

3M™ 5500A series splice kits are for tape, wire, LC (longitudinally corrugated) shielded cables, or Unishield® cables. The kits come with the splice body, a separate one-piece re-jacketing tube and all components necessary to splice one cable. The kits can be ordered with or without a connector.

\*\*4/0 AWG and 250 kcmil cable may be used with aluminum connectors only—do not use 4/0 AWG or 250 kcmil copper connectors.

# 3M™ Cold Shrink Silicone Rubber Splice QS-III single-core: Installation in a few easy steps

1. Prepare cable and make connection. Position 3M™ Cold Shrink Silicone Rubber Splice QS-III components

2. Position splice and unwind core

3. Re-jacket Splice

4. Completed Splice

# 3M™ Cold Shrink Silicone Rubber Splice QS-III three-core: Installation in a few easy steps

1. Prepare cable and make connection. Position 3M™ Cold Shrink Silicone Rubber Splice QS-III components

2. Position splice and unwind core

3. Re-shield Splice

4. Re-jacket Splice

5. Re-jacket/Re-armor Splice

**Caution:** Working around energized systems may cause serious injury or death. Installation should be performed by personnel familiar with good safety practice in handling electrical equipment. De-energize and ground all electrical systems before installing product.
