GREENLEE®

A Textron Company

**MADE
FOR THE
TRADE™**

Engineered To Be The Best!

Greenlee is proud to introduce our new and improved Hole Saws. These Hole Saws were designed to cut faster, last longer and provide even greater value than before. The new and improved Greenlee Hole Saw cuts **up to 30% faster than the competition** – saving you time and money on the job.

The new robust tooth design is made from a higher quality steel that's fully hardened for a stronger, more durable saw that's tough enough to cut through the most demanding cutting applications.

A key feature of Greenlee Hole Saws has always been its oxide finish. The oxide finish resists rust and chip build-up for easier cutting. There is no paint on the saw that melts while cutting – so there's no paint gum-up or possible smoke when heated.

In addition to the oxide finish, the Greenlee Hole Saws are clearly marked for easy size identification and includes the part number for convenient reorder reference.

Finally, Greenlee Hole Saws can be used with the Greenlee removable depth stop (826S) for added protection when cutting in areas where wires may be present, and with the Quick Change arbor for fast and easy changeovers.

Give them a try and you will see that we have made a great product even better. Just more ways Greenlee is there with you, helping get the job done faster, safer and easier.
