PRO SERIES®

The most power & performance your customers can buy.

InSinkErator® is delivering an exciting line of disposers developed for professionals – PRO Series. These disposers feature SoundSeal® and MultiGrind® technologies to provide professionals with more power and the best in sound reduction and grind capabilities, and a longer warranty advantage – exactly what customers expect from a PRO.

MultiGrind® GRIND MORE.

Innovative technologies make Evolution PRO Series® disposers more advanced than anything on the market today. Which means that you can grind foods finer, without clogs or jams. Foods that you used to throw in the trash can now be put in the disposer.

3 GRIND STAGES

A three-stage technology allows you to grind almost any food waste. It also includes a Jam-Sensor® Circuit that virtually eliminates jams.

- celerv • potato peels
- · rib bones corn cobs

2 GRIND STAGES

This two-stage technology quickly grinds food waste significantly better than any previous disposer.

 celerv • potato peels

MultiGrind® Technology

GrindShear Ring®

Grinds food in two stages. First, food waste material is ground into small particles along the surface of the ring. Second, the particles are forced through a series of pass-through windows and sheared into even finer waste. The ideal solution for stringy foods like cornhusks and celery.

Tri-Action Lug® System*

Swivel lugs work with the GrindShear Ring® to perform the first and second stages of grind. Fixed lugs grind particles finer than swivel lugs alone. And the system's lug configuration propels water throughout the grind chamber, helping to rinse it clean.

Undercutter Disk®*

Located along the leading edge of the shredder plate, the undercutter mechanism performs the third stage of grind. It cuts particles one more time after they've passed through the GrindShear Ring® to help eliminate clogs.

Jam-Sensor® Circuit*

Senses when a jam is imminent and automatically engages, increasing the rotational torque of the motor up to 500% while simultaneously pulsing at a rate of 60 times per second. Breaks through the toughest food jams automatically.

*On PRO 1100XL® and PRO 1000LP® models only

SoundSeal® HEAR LESS.

Customers have always been concerned about disposer noise. That's why we've reduced noise levels on the PRO Series® disposers to the point where you can hold a conversation at normal volume while in the kitchen with the disposer running.

Can hold a conversation with normal voices in same room.

QUIETER

Can hold a conversation with elevated voices in same room.

QUIET

Delivers quiet performance versus a standard disposer.

SoundSeal® Technology

Quiet Collar® Sink Baffle

Baffle design causes running water to pool in the sink opening. The resulting thin "water dam" acts as a cap on the dispose and reduces the amount of noise that comes up through the sink opening.

Anti-Vibration Mount®

Isolates the disposer in a cushion of rubber, which reduces the transfer of noise and vibration from the disposer to the sink.

Multi-Layer SoundLimiter™ Insulation

Multiple layers of open and closed-cell material both muffle and trap noise emitted by the disposer.

Anti-Vibration Tailpipe Mount™

Mounts the tailpipe in a cushion of rubber that reduces the vibration transmitted to downstream plumbing, reducing noise.

Exclusive Patented Technology

Quick Lock® Sink Mount -

InSinkErator® exclusive Quick Lock mounting ensures fast, secure installation and eases replacement of existing InSinkErator disposers. One twist locks disposer in place.

Stainless Steel Grind Chamber* & Components

Stainless steel design protects against corrosion and adds strength, which translates to longer life.

Heavy Duty Dura-Drive® Motor -

Reliably handles heavy daily use while delivering maximum grinding power, quiet operation and longer life.

Auto-Reverse Grind System®

Helps prevent jams by automatically reversing grind direction.

DO'S & DON'TS FOR TROUBLE-FREE DISPOSER OPERATION

DO:

- Run disposer along with a moderate flow of cold water.
 Continue to run cold water for a few seconds after grinding is complete.
- See instructions on your specific model of disposer for what types of food you can grind.
- Grind small amounts of hard material such as small bones, fruit pits, and ice. A scouring action is created by the particles inside the grind chamber.
- Grind peelings from citrus fruits to freshen up drain smells.

DON'T:

- DON'T POUR GREASE OR FAT DOWN YOUR DISPOSER OR ANY DRAIN. It can build up in pipes and cause drain blockages. Put grease in a jar or can and dispose in the trash.
- DON'T use hot water when grinding food waste. It is OK to drain hot water into the disposer between grinding periods.

RECYCLE YOUR FOOD WASTE

InSinkErator® food waste disposers don't just offer practical convenience; they provide an environmentally sound alternative to the food waste challenge.

The environmental advantages of food waste disposers have been demonstrated and documented by third party studies from around the globe.

Food waste disposers can provide an environmentally responsible alternative to transporting food waste to landfills. And they can help reduce greenhouse gas emissions. In communities with capable wastewater treatment plants, food waste can be recycled to produce renewable energy. Additionally, capable wastewater treatment plants can process food waste into fertilizer. (Check the plant in your area.)

Feed a Disposer ... Starve a Landfill.®

Water Dispensing Technologies

Hot Water Now.

Near-boiling water? Right when you need it? That's hot. An InSinkErator® instant hot water dispenser sits right on the edge of your kitchen sink, the perfect complement to your faucet. Ready to dispense filtered near-boiling water (maximum 200°F in tank) at your command.

Eat. Drink, Clean, Nurture,

There are 101 ways to use an instant hot water dispenser, until you discover more. Cook pasta al dente, kick-start boiling pot of water, blanch vegetables, thaw frozen foods, serve the perfect cup of tea, prepare baby bottles and foods, clean dirty dishes and clean without harsh chemicals. With an instant hot water dispenser, the possibilities are endless.

Your Style. Your Kitchen. Your Choice.

From traditional to transitional to modern, faucet styles and designer finishes are made to coordinate with your kitchen décor.

- Durable all brass construction with swivel spout
- Near-boiling water (maximum 200°F in tank) (H model only)
- 2/3 gallon stainless steel tank with F-1000S filtration system sold separately
- Cool filtered water (C model only)
- Automatic shut-off of hot water upon release of lever
- We Come To You[®] 5-Year In-Home Limited Warranty

Melea

A stately look that highstyle homeowners will love.

Finishes: Chrome, Satin Nickel, Polished Nickel, Oil-Rubbed Bronze and Matte Black

Iris

Traditional.

Sculpted design pairs well with faucets that feature classic lines and finishes.

Finishes: Chrome, Satin Nickel, Polished Nickel and Oil-Rubbed Bronze

Accessories

InSinkErator® offers an entire range of accessories, from stoppers to flanges to special switches. They're made to the highest standards. And they're made to fit. So you know they'll work properly and install easily.

Dual-outlet Design

SinkTop Switch™

Convenient alternative to a wall switch.

- · Air-activated
- · Mounts easily to sink or countertop
- · Perfect for island installations
- Dual-outlet design also accommodates an instant hot water dispenser
- Single-outlet kit includes Chrome, White and Satin Nickel button finishes to match most decors
- Dual-outlet kit includes Chrome and White button finishes
- Satin Nickel, Polished Nickel, Gloss Black, Matte Black, Biscuit, Mocha Bronze, Oil-Rubbed Bronze, Classic Oil-Rubbed Bronze, Brushed Bronze, and French Gold button finishes available by special order
- · For use with all InSinkErator disposers

Custom Sink Flanges

Popular designer colors add unique style to kitchens.

 Available in Stainless Steel, White, Biscuit, Matte Black, Brushed Stainless Steel, French Gold, Mocha Bronze, Oil-Rubbed Bronze, Brushed Bronze*, Classic Oil-Rubbed Bronze* and Polished Nickel*
 (*Available 2017)

For use with all InSinkErator® disposers

Quick Lock® Sink Mount

Available only from InSinkErator.

- "Twist-On, Twist-Off" Quick Lock design ensures fast, easy replacement of existing disposer mounts
- Polished Stainless Steel InSinkErator sink flange complements Stainless Steel sinks
- For use with all InSinkErator disposers

Dishwasher Connector Kit

Fast, easy way to connect a dishwasher drain to the disposer.

• For use with all InSinkErator® disposers

Custom Sink Stoppers

Stops water and food particles from going down the drain.

- Available in Stainless Steel, White, Biscuit, Matte Black, Brushed Stainless Steel, French Gold, Mocha Bronze, Oil-Rubbed Bronze, Brushed Bronze*, Classic Oil-Rubbed Bronze* and Polished Nickel* (* Available 2017)
- For use with all InSinkErator disposers

Antimicrobial Quiet Collar® Sink Baffle

Replacement sink baffle for Evolution Series® disposers.

- Helps reduce sound and is easily removed for cleaning
- Antimicrobial feature helps inhibit growth of odor-causing bacteria

Removable Sound Baffle

Specifically designed to muffle disposer noise while preventing water and food particles from splashing back up.

 For use on all InSinkErator Badger disposers

Standard Mounting Gasket

Replacement sink gasket designed specifically for use on all InSinkErator® Badger® disposers.

Flexible Discharge Tube

Provides a quick way of connecting disposer discharge to the drain line.

- Flexes and offsets up to 2"
- Retracts and extends 6" to 10"
- Forms tight right angles or slight angles to meet existing 1-1/2" drain plumbing
- For use on all InSinkErator disposers

Bio-Charge®

Fits Septic Assist disposers.

- Lasts 3 to 4 months with average use (equal to 4 bottles of other septic treatments)
- Citrus scent helps control odors from sink drain

Power Cord Kit

Easy to install.

- Allows disposer to be plugged directly into standard wall outlet
- Includes 3-foot UL-listed cord, strain relief clamp, wire connectors and instructions
- For use with all InSinkErator disposers

Jam-Buster[™] Wrench

Hex wrench that quickly frees simple jams.

- Inserts into center hole in bottom of the disposer
- Turn back and forth to free jam
- For use with all InSinkErator® disposers

SilverSaver Stopper™

- Versatile dual-position stopper lets water and small food particles "in" the disposer, but keeps silverware and other objects "out."
- For use with all InSinkErator disposers
