

Food Waste Disposers and Instant Hot Water Dispensers

Food Waste Disposers and the Environment

Disposers help manage food waste in an environmentally responsible manner

At capable wastewater treatment plants, food waste can be recycled to produce methane that can be used as a renewable source of power for the plant.

Additionally, wastewater treatment plants can process food waste into biosolids to be used as fertilizer and soil conditioner.*

And, disposers use only about 1% or less of a household's total water consumption, and cost on average less than 50 cents a year in electric usage.

Food Waste Facts

- In 2008, more than 13 million tons of food scraps were sent to U.S. landfills.
- Decomposing food waste in landfills can produce methane, a greenhouse gas.
- Composting is great, but it can be challenging in urban settings and cold climates. Disposers complement composting by grinding food waste that shouldn't be composted, like meat and dairy products.
- Food waste disposers grind food to less than 1/4-inch in size, so it's safe for household and municipal pipes.
- When using a disposer, run cold water for several seconds afterward to flush food waste through the plumbing.
- Don't put fats, oils or grease down any drain. Put it into a container and throw it in the trash.

* Not all plants have this capability. Check in your area.

EvolutionSeries®

Technology

The Evolution Series® by InSinkErator® is a new standard in grind and sound performance. Featuring patented **MultiGrind®** and **SoundSeal®** technologies, Evolution Series disposers grind more with less noise.

Grind More.

MultiGrind® Technology

Reduces clogs and jams.

With 2 or 3 stages of grind, you are able to more efficiently grind difficult food items like bones.

Accessories

InSinkErator® offers an entire range of accessories, from stoppers to flanges to special switches. They're made to the highest standards. And they're made to fit. So you know they'll work properly and install easily.

Quick Lock® Sink Mount

Available only from InSinkErator.

- "Twist-On, Twist-Off" Quick Lock design ensures fast, easy replacement of existing disposer mounts
- Polished stainless steel InSinkErator sink flange complements stainless steel sinks
- For use with all InSinkErator disposers

Quiet Collar® Sink Baffle (Antimicrobial)

Replacement sink baffle.

- Helps reduce sound and is easily removed for cleaning
- Antimicrobial feature helps inhibit growth of odor-causing bacteria
- For use with all Evolution Series® disposers

Power Cord Kit

Easy to install.

- Allows disposer to be plugged directly into standard wall outlet
- Includes 3-foot UL-listed cord, strain relief clamp, wire connectors and instructions
- For use with all InSinkErator disposers

Custom Sink Stoppers

Stops water and food particles from going down the drain.

- For use with all InSinkErator® disposers

Stoppers are available in polished and brushed stainless steel, polished brass, white, biscuit, matte black, oil-rubbed bronze, French gold and mocha bronze

SinkTop Switch™

Convenient alternative to a wall switch.

- Air-activated
- Mounts easily to sink or countertop
- Perfect for island installations
- Kit includes satin nickel, chrome and white finishes to match most decors
- Gloss black, biscuit, mocha bronze, oil-rubbed bronze, matte black and French gold available by special order
- For use with all InSinkErator disposers

Yes! you can use a disposer with a septic system

Evolution SEPTIC ASSIST®

Created specifically for homes with septic systems

- A small amount of **Bio-Charge®** solution featuring microorganisms that break down food waste is injected every time the disposer is activated to keep your septic system functioning properly
- **MultiGrind®** Technology
- **SoundSeal®** Technology
- 40-oz Grind Chamber Capacity
- 3/4 Horsepower
- **We Come to You®** 4-Year In-Home Limited Warranty**

Bio-Charge®*

Fits Septic Assist® Disposers.

- Lasts 3 to 4 months with average use (equal to 4 bottles of other septic treatments)
- Citrus scent helps control odors from sink drain

* Order in store or on Lowes.com

** See packaging for warranty details.

Easy To Install

How-To

STEP 1

Remove Old Disposer

Turn off the electrical power in your home. Disconnect the old disposer's electrical wires and plumbing. Remove old disposer.

STEP 2

Make Electrical Connections

Connect wiring before mounting disposer. Be sure to knock out the dishwasher plug if you are installing a dishwasher.

STEP 3

Twist on New Disposer

Twist disposer onto Quick Lock® assembly, reconnect plumbing, and turn on electrical power in your home.

STEP 4

Make Plumbing Adjustments*

Lock disposer in place and make final plumbing adjustments.

* Slight plumbing modifications may apply depending on individual household plumbing.

Recommended Tools for Installation

We Make it Simple to Install

Any new InSinkErator® disposer can replace any existing InSinkErator disposer model. Since four out of five disposers are made by InSinkErator, disposer replacement is usually fast and easy. Thanks to our Quick Lock® mounting assembly, the new model simply twists into place.

Installation Checklist

Your new Disposer comes with:

Sink Flange & Stopper

Discharge Elbow

Discharge Tube

Jam-Buster™ Wrench

When installing you may need:

Plumber's Putty

Screw Drivers

Hack Saw

Hammer

Pliers

Power Cord Kit may be needed for installation.

See installation care and use manual for additional information.

Instant Hot Water Dispensers

Hot Water **Now.**

Instant near boiling 200° F water right at your kitchen sink.

Eat.

Drink.

Clean.

Nurture.

Professional Installation is Suggested.

Hot Water Dispenser Filtration Systems

NEW & IMPROVED Hot Water Tank HWT-F1000S*

Available only from InSinkErator®

- Stainless Steel construction for longer life
- F-1000S filtration system included for fresher tasting water
- 35% more near-boiling water from larger 2/3 gallon stainless steel tank
- Easy to adjust temperature control
- Tool-free tank connections and dry-start protection to ease installation
- Provides 60 cups/hour of 200°F (near-boiling) water
- *We Come To You®* 3-Year In-Home Limited Warranty**
- 115 volts, 750 watts, 6.25 amps
- UL and NSF listed
- Compatible with all InSinkErator® dispensers (excluding Hot1 model)

F-1000S

- Designed for exclusive use with InSinkErator® water dispensing system
- Reduces particulates, chlorine taste and odor
- Sanitary, quick-change filter cartridge
- Quick-connect fittings guarantee easy installation
- Automatic water shut off during cartridge replacement
- *We Come to You®* 1-Year In-Home Limited Warranty on F-1000S Filtration System** (excludes filter replacement cartridge)
- NSF® Standard 42
- 6 month recommended usage

F-1000 (Contains 1 cartridge)

- Replacement filter cartridge for F-1000S filtration system
- Reduces particulates, chlorine taste and odor
- NSF® Standard 42

F-2000 (Contains 1 cartridge)

- Replacement filter cartridge for F-1000S filtration system
- Reduces particulates, chlorine taste and odor
- Also reduces cysts, lead, mercury, asbestos and chemicals
- NSF® Standard 53 and 42
