

PRO SERIES®

FOOD WASTE DISPOSERS

A full line of disposers
built by pros, for pros.

InSinkErator® – Built to perform

As a professional, you put your reputation on the line with every food waste disposer you recommend or install. Protect that reputation by selecting from a line of hardworking InSinkErator disposers, each designed to give you an edge through long-term performance and customer satisfaction.

Built to last

For more than 80 years, we've made it our mission to constantly innovate to make our products quieter, more powerful and more durable. It's safe to say no one else knows and understands kitchen food waste solutions better than we do. And that's why InSinkErator disposers - designed and assembled in the U.S.A. - are the world's best-selling brand.

The right disposer for any customer, any home

Designers and plumbing professionals know InSinkErator® food waste disposers make kitchen cleanup fast and easy. InSinkErator makes it just as fast and easy to spec the right disposer for every home, every time. Simply select the disposer series that matches the customer’s home and lifestyle, then identify the disposer model within that series that matches the features they are looking for.

STANDARD SERIES

We call them standard, but they deliver beyond their pay grade.

Galvanized steel grind components for long-lasting performance in a value-priced disposer.

BEST FOR the occasional disposer user looking for a reliable tool to help with simple kitchen cleanup.

CONTRACTOR SERIES

Built with extra power to help them go the extra mile. Or the extra meal.

Additional grind capabilities and horsepower to take on the toughest food scraps.

BEST FOR larger families, older homes and those who use their disposer every day during meal prep and cleanup.

PRO SERIES

No matter how hard they're asked to work, they barely make a sound.

Advanced sound reduction and MultiGrind® technology delivers best-possible grind with least-possible noise.

BEST FOR open concept kitchens, frequent entertainers and people who simply want the peace and quiet of a nearly silent disposer.

Quietly doing amazing work

Advanced technology built into InSinkErator® PRO Series® disposers minimizes sound while maximizing performance. SoundSeal® keeps them quiet, while MultiGrind® and its multiple grind stages easily handles even the toughest food scraps.

Whether customers select their disposer based on sound, grind capability or both, with InSinkErator there's always the right model for the right kitchen in the right home.

SELL YOUR CUSTOMERS A QUIETER KITCHEN

With a full range of sound options - from Standard to Ultra-Quiet - there is an InSinkErator disposer to match every lifestyle, home and budget.

STANDARD

Conversations at normal levels may need to be briefly paused.

Basic disposer noise levels.

SoundSeal® Technology QUIET

Delivers quiet performance versus a standard disposer.

Noise levels are reduced compared to standard disposers.

SoundSeal® Technology QUIETER

Can hold a conversation with elevated voices in the same room.

This combination of advanced sound insulation and anti-vibration components reduces noise levels compared to standard disposers.

SoundSeal® Technology ULTRA-QUIET

Can hold a conversation with normal voices in the same room.

This extra technology adds multi-layered, sound-blocking insulation to reduce noise levels compared to standard disposers.

HELP THEM GRIND MORE FOOD TYPES FINER

Advanced grind technology takes on even the toughest food scraps, so your customers spend less time worrying about cleanup and more time enjoying a sparkling kitchen.

Standard Technology

1 GRIND STAGE

You can quickly grind most edible table scraps and food waste from meal prep.

FRUITS & VEGETABLES

Apple Cores, Citrus Rinds

FIBROUS MATERIALS

Chopped Celery, Kiwi Skins, Asparagus Stems, Carrot Tops

HARD MATERIALS

Avoid non-edible items

MultiGrind® Technology

2 GRIND STAGES

You can efficiently grind difficult food items like bones and potato peels.

FRUITS & VEGETABLES

Apple Cores, Citrus Rinds, Potato Peels

FIBROUS MATERIALS

Banana Peels, Celery, Corn Cobs, Artichokes

HARD MATERIALS

Bones, Fruit Pits

MultiGrind® Technology

3 GRIND STAGES

You can stop worrying about what foods you can/cannot put in your disposer.

FRUITS & VEGETABLES

Apple Cores, Citrus Rinds, Potato Peels

FIBROUS MATERIALS

Powers through all types of fibrous foods

HARD MATERIALS

Bones, Fruit Pits

Jam-Sensor® circuit virtually eliminates jams & clogs

The incomparable Evolution PRO 1100XL® handles more food types, more food volume and more challenges than any other disposer, and is virtually noise-free.

You can stop worrying about what foods you can/cannot put down your disposer. A three-stage grind technology allows you to grind almost any food waste.

Why is Evolution PRO 1100XL® our ultimate performing disposer?

It's simple. Evolution PRO 1100XL powers through the toughest foods and is also the quietest disposer on the market. In addition to SoundSeal® and MultiGrind® technology (three-grind stages), PRO 1100XL® also features an Auto-Reverse Grind System® and Jam-Sensor® circuit, which provides extra torque when needed to break through tough jams.

Anti-vibration mounts for the sink and tailpipe eliminate noise from connection points, and the antimicrobial Quiet Collar® sink baffle virtually puts a lid on the disposer to ensure ultra-quiet operation.

FEATURES

The garbage crisis

Garbage is a big problem—we generate about four and a half pounds of trash per person, per day here in the U.S. By 2021, only 15 years of landfill capacity will remain. While there's no single solution for reducing the world's waste, even the little things we do can have an important impact on the environment—like using an InSinkErator® food waste disposer to keep food scraps out of landfills.

FOOD WASTE AT THE CENTER OF THE CRISIS

- ❗ Each year the U.S. sends about **30.6 million tons of food scraps and food waste to landfills**. That's the weight of 15 million cars, and just like cars, that food waste creates pollution.
- ❗ Speaking of cars, **the world's food waste generates the equivalent of 485 million metric tons of CO² each year**, equal to the annual emissions of 100 million cars.
- ❗ Since **food waste is 75% to 90% water**, it is **a significant contributor to landfill leachate**—the toxic liquid that 'leaches' from a landfill as trash decomposes—and there's a significant cost to capturing and treating it before it reaches and pollutes water sources.

SMALL CHANGES CAN HAVE A BIG IMPACT

- ✅ On average, the energy used to run a disposal comes out to less than \$0.60 a year. When a community of 30,000 households grinds its food waste in a disposal instead of sending it to landfills, it has the same positive effect on greenhouse gas emissions as planting 31,435 trees; diverted to biogas production, it could create enough electricity to power 322 homes.
- ✅ Over the past 80 years, **InSinkErator has kept 80 million tons of food scraps out of landfills**. Less food waste decomposing into methane gas and fueling climate change means a better environment for all of us. Using an InSinkErator garbage disposal to grind your food scraps is a small action you can take that can have a big impact on your kitchen, community and environment.

Accessories

InSinkErator offers an entire range of accessories that are made to the highest standards. And they're made to fit. So you know they'll work properly and install easily.

Quick Lock® Sink Mount

Available only from InSinkErator.

- "Twist-On, Twist-Off" Quick Lock design ensures fast, easy replacement of existing disposer mounts
- Polished stainless steel InSinkErator sink flange complements stainless steel sinks
- For use with all InSinkErator disposers

Custom Sink Flanges and Stoppers

Popular designer colors add unique style to kitchens.

- Available in polished stainless steel, brushed stainless steel, white, biscuit, French gold, brushed bronze, mocha bronze, oil-rubbed bronze, polished nickel and matte black
- For use with all InSinkErator disposers

SinkTop Switch™

Convenient alternative to a wall switch.

- Air-activated
- Mounts easily to sink or countertop
- Perfect for island installations
- Two-outlet design also accommodates an instant hot water dispenser
- Kit includes satin nickel button
- Available by special order in satin nickel, black, biscuit, brushed bronze, French gold, mocha bronze, oil-rubbed bronze, classic oil-rubbed bronze, polished nickel and matte black
- For use with all InSinkErator disposers

Antimicrobial Quiet Collar® Sink Baffle

Replacement sink baffle for Evolution Series® disposers.

- Helps reduce sound and is easily removed for cleaning
- Antimicrobial feature helps inhibit growth of odor-causing bacteria

Power Cord Kit

Easy to install.

- Allows disposer to be plugged directly into standard wall outlet
- Includes 3-foot UL-listed cord, strain relief clamp, wire connectors, instructions
- For use with all InSinkErator disposers

Dishwasher Connector Kit

Fast, easy way to connect a dishwasher drain to the disposer.

- For use with all InSinkErator disposers

Bio-Charge®

Fits Septic Assist Disposers.

- A small amount of solution featuring microorganisms that break down food waste is injected every time the disposer is activated to keep your septic system functioning properly
- Lasts 3 to 4 months with average use (equal to 4 bottles of other septic treatments)
- Citrus scent helps control odors from sink drain
