

## XHHW 2

### GENERAL INFO

General purpose building wire for use primarily in conduit or other recognized raceways as specified in the National Electrical Code (NEC®). Industrial environments where superior insulation toughness and chemical resistance are required. Maximum operating temperature not to exceed 90°C wet or dry locations. In free air, raceways or cable trays in accordance with NEC. Features include: “FOR CT USE” on 1/0 AWG and larger, sunlight-resistant for 1/0 AWG and larger, all colors, rated at 90°C wet or dry, smaller cable O.D., excellent electrical, thermal and physical properties, excellent resistance to moisture, excellent resistance to crush, compression cuts and heat deformation, high Speed (HS) cable features a specially designed XLPE insulation that allows for fast and easy cable pulls - 8 AWG and larger, meets cold bend and cold impact tests at -25°C.
